Answers to exercises 1–6 and 10–12 are contained in the audio scripts for download on the website at www.nhantriviet.com.

There are 10 parts in each section of the book. The first part of each section is a summary of the main themes for a particular theme which includes some grammar, some collocations and some common IELTS vocabulary. The activities in this section are designed to help you practise the grammar and collocations you have learned so far. The activities in this section also include a listening exercise, a reading exercise, a speaking exercise and a writing exercise. You will probably find it useful to complete and record the activities in this section before moving on to the following sections.

In order to learn a new word, it is usually necessary to learn a few words. The second part of each section helps you to do this. It is also a good idea to learn a few words that are relevant to a particular situation. For example, if you are learning about food, it is a good idea to learn some words that are related to food. In each of these sections, there are two words that are related to food. These words are chosen to help you learn more about food. Learning these words, it will be easier to understand what is being said in the sections that follow.

As a final preparation before you begin your exam, read the exam tips in the box. This will remind you of the strategies that you can use to help you pass the exam.

Answer key
A comprehensive answer key is contained in the audio scripts for download on the website at www.nhantriviet.com.

Collocations
Common collocations for art, society, culture and education are included in the audio scripts for download on the website at www.nhantriviet.com.

Introduction

Who is this book for?

Vocabulary for IELTS helps you improve your vocabulary when preparing for the IELTS examination. You can use the book to study on your own or as supplementary material for IELTS preparation classes. It is suitable for learners at level 5.0 to 5.5 aiming for band score 6.0 or higher.

Summary

The *Vocabulary for IELTS* book and CD cover vocabulary items and skills which are relevant to all four exam papers: Listening, Reading, Writing, and Speaking. In each unit, you work towards an exam practice exercise which is modelled on the actual IELTS exam. Each unit contains activities that help you develop, step by step, the vocabulary knowledge and skills to help you tackle the exam. Exam tips throughout the book highlight essential vocabulary-related learning strategies and exam techniques.

Contents

Units

Each unit is divided into three parts.

Part 1: Vocabulary introduces vocabulary items related to the topic or function of the unit. Definitions for this vocabulary are presented using standard English-English dictionary, and IELTS-style example phrases or sentences show how the words are used in context. Parts of speech and the different forms of the words are also listed.

Part 2: Practice exercises provide a structured set of exercises which helps you develop the skills to successfully apply vocabulary knowledge to the exam. Each unit focuses on developing vocabulary and skills for a particular paper, and the practice exercises provide practice for the particular paper.

Part 3: Exam practice provides exam practice exercises in a format that follows the actual exam giving you the opportunity to familiarise yourself with the kinds of questions you will encounter in the exam. This section focuses on a particular exam paper and is highlighted in grey for easy reference.

Exam tips

There are exam tips in each unit. These are in boxes for easy reference.

Audio scripts

All scripts for the Listening and Speaking papers have been recorded on the CD using native speakers of English. All scripts are provided at the back of the book so that you can check the language used in the listening and speaking exercises, if needed.

Answer key

A comprehensive answer key is provided for all sections of the book including model answers for more open-ended writing and speaking tasks.

Collocations

At the back of the book, you can further develop your vocabulary by studying the list of the most common collocations for the vocabulary related to the topic or function of each unit.

How to use this book

The book is divided into 20 units. Units 1–9 cover vocabulary for topics that frequently appear in the exam, such as health and education. Units 11–19 cover words for general functions, such as describing problems and solutions. Units 10 and 20 provide revision exercises. Unit 10 revises the vocabulary and skills covered in Units 1–9, and Unit 20 revises the vocabulary and skills covered in Units 11–19. All 20 units help you develop skills such as paraphrasing and working out the meaning of unfamiliar words from context.

Each unit is self-contained so that you can study the units in any order. You can choose the unit you want to study either by selecting the topic you want to study, or by selecting which exam paper you want to practise. Only the units with practice on the Speaking and Listening papers contain audio. The contents pages at the beginning of the book provide an overview of what is in each unit so you can use this to choose which units you would like to study first. These pages also give you information on which units contain audio.

You will probably find it helpful to begin each unit by reading the vocabulary items in Part 1, then working through the exercises in preparation for the exam practice exercise at the end. Try to do the exam exercises within the time limit to give yourself realistic exam practice.

In order to learn a new word, it is usually necessary to revisit it several times. The revision units help you to do this. However, it is also a good idea to avoid writing your answers in the book so that you can do the exercises again at a later date.

It is also advisable to keep a vocabulary notebook. Knowing a word and how to use it involves understanding many aspects of it. The more information you can record about the words you are learning, the more useful it will be. Key definitions, parts of speech, common collocations and example sentences are all very helpful. Don't forget to use the Collocations section at the back of the book to help with this.

Getting well-informed feedback on your writing and speaking exam practice exercises would also be an advantage. However, if this is not possible, it is still important to do the exercises in full. Studying model answers can help you develop the ability to assess your own work. If possible, record yourself when speaking, and listen carefully to your performance. Avoid memorising model answers. Remember that in the actual exam, it is important to answer the question and not just speak or write about the topic.

As a final preparation before the exam, you could re-read the exam tips in the boxes. This will remind you of the strategies for success in the exam.

Practice exercises

- 1 Circle the words that you associate with family relationships. Underline the words you associate with professional relationships.

- | | |
|-----------|-------------|
| a client | d colleague |
| b parent | e spouse |
| c sibling | f employer |

- 2 Listen to three speakers talking about people who have been important to them. Indicate the person each speaker describes by writing a letter a-f from Exercise 1 in each space.

- 1 _____
2 _____
3 _____

Exam tip:

- You can often recognise whether a word is a noun, verb, adjective or adverb from its ending.
- Adjectives can have many different endings, but these are common.

-able/-ible	vulnerable, flexible	-ic	idealistic
-al	conventional	-ive	co-operative
-ant/-ent	tolerant, consistent, efficient	-ous	autonomous

- Learn to recognise these.

- 3** Listen again to the three speakers and write down the adjectives from the table above that you hear. Listen for the word endings: -able, -ible, -al, -ant, -ent, -ic, -ive, -ous.

- 1 _____
- 2 _____
- 3 _____

Exam tip: In Section 4 of the IELTS Listening exam, you have to listen to a talk on a topic of general academic interest.

You do not need to know all of the vocabulary.

If you hear a word you don't know, listen for expressions like:

- a i.e.
- b in other words
- c that is
- d by ... I mean
- e that is to say

The text that follows these expressions helps you understand the word.

Example: Employers value **conscientious** workers, that is, workers who complete tasks with care.

- 4** Listen to the extract from a lecture about only children and notice the expression the speaker uses to indicate she is defining key expressions 1–6 below. Look back at the Exam tip and write a letter a–e in each space.

- 1 only children _____
- 2 parental resources _____
- 3 tolerant _____
- 4 co-operative _____
- 5 autonomy _____
- 6 unconventional _____

- 5** Listen to the extract again and complete the definitions the speaker gives for words 1–6 above. Write one word in each space.

- 1 only children – 'children without _____'
- 2 parental resources – 'not just money, but also _____ and _____'
- 3 tolerant – 'able to accept _____'
- 4 co-operative – 'able to work _____ with _____'
- 5 autonomy – 'ability to _____ their own _____'
- 6 unconventional – 'not quite _____ in social terms'

Exam practice: Listening – multiple choice

Listen to the lecture extract about birth order and personality and answer questions 1–5 by choosing the correct letter A, B or C.

Exam tip: Listen for key adjectives and clues in the context for what they mean.

- 1 What does the speaker discuss in relation to personality?
 - A Family size
 - B The relationship between children and their parents
 - C People's position in the family

- 2 What does the speaker imply about anxiety?
 - A It is a positive trait.
 - B It is a negative trait.
 - C It is experienced by younger siblings.

- 3 What do some researchers say about youngest children?
 - A They form relationships easily.
 - B They agree with the opinions of other people.
 - C They like it if people agree with them.

- 4 Why are middle children considered to be rebellious?
 - A They don't like to be told what to do.
 - B They don't know how to be agreeable.
 - C They like to be different from others.

- 5 What does the speaker say about the quality of research on birth order?
 - A Most research has been done correctly.
 - B Most research has been done incorrectly.
 - C Most research has come to a clear conclusion.

2 Health

Nouns for symptoms | Verbs for treatment

- tests in order to check how healthy you are.
- Another doctor examined her and could still find nothing wrong.
 - **screen (screens, screening, screened)**
VERB To **screen for** a disease means to examine people to make sure that they do not have it. ▪ Men over 50 are routinely screened for prostate abnormalities.

- **vaccinate (vaccinates, vaccinating, vaccinated)**
VERB A vaccine is a harmless form of the germs that cause a particular disease. If a person or animal is **vaccinated**, he/she/it is given a vaccine, usually by injection, to prevent him/her/it getting that disease. ▪ Dogs must be vaccinated against distemper.

Practice exercises

- 1 The words below describe different disorders. Circle the words that you associate with rich countries. Underline the words you associate with poor countries.

a infection	e stroke
b heart disease	f dehydration
c allergies	g addiction
d obesity	
- 2 Read the passage below and compare your answers to Exercise 1 with the information in the passage.

Diseases of Affluence – Diseases of Poverty

Health conditions associated with wealth are sometimes referred to as diseases of affluence. These include diseases which are not communicable, such as Type 2 diabetes, cancer, and stroke as well as alcohol and drug addiction, obesity and some allergies. Risk factors for these conditions are associated with the lifestyle of the economically prosperous, in particular: physical inactivity, easy availability of meat, sugar, salt and processed foods, excessive consumption of alcohol and tobacco, and lower exposure to infectious agents.

The diseases of poverty, in contrast, are predominantly infectious diseases such as HIV/AIDS, tuberculosis, malaria, and diarrhoeal diseases. Risk factors for these conditions include: overcrowding, inadequate sanitation, malnutrition, and inadequate access to health care. Millions of lives could be saved every year by addressing these underlying problems and by simple preventive measures such as immunising the population against common infectious agents.

Exam tip: In the IELTS Reading exam, you may have to indicate whether statements about a passage are True, False or Not Given (i.e. not mentioned).

You can often recognise a True statement if you can match it to a part of the passage that expresses the same idea in different words.

Recognising synonyms (words with approximately the same meaning) can help you do this.

Example: Allergies are common in **wealthy** countries. Allergies are common in **affluent** countries.

- 3** Underline words in the passage for Exercise 2 which could be replaced by the words in bold below.

- 1 Minor skin disorders do not normally require hospital treatment.
- 2 Misuse of prescription drugs is a growing problem.
- 3 Germs can cause stomach upsets.
- 4 Vaccinating children against measles has reduced the prevalence of this disease.

- 4** The words below describe actions that medical staff may take when a person enters hospital. Number the verbs from 1 to 5 to show the order in which they typically occur.

diagnose _____	discharge _____	admit _____	treat _____	examine _____
----------------	-----------------	-------------	-------------	---------------

Exam tip: In the IELTS Reading exam, you may have to complete gaps in sentences with words from a reading passage. Recognising collocations (i.e. words that commonly go together) can help you do this.

If you look carefully at the words on either side of the gap, you may be able to use your knowledge of collocations to choose the right word(s).

Example: The patient was _____ for cancer. The patient was treated for cancer.

- 5** Complete the sentences below with words a–e. Look carefully at the prepositions after the gaps to help you choose the right word.

a vaccinated	b diagnosed	c screened	d administered	e discharged
--------------	-------------	------------	----------------	--------------

- 1 In poor countries, patients are sometimes _____ from hospital before they are fully cured.
- 2 If all women over the age of 50 are _____ for breast cancer, many lives can be saved.
- 3 The patient was _____ with heart disease.
- 4 All children should be _____ against infectious diseases such as measles.
- 5 The doctor _____ a drug to the patient to help him sleep.

Exam practice: Reading – True/False/ Not Given – completing sentences

QUESTIONS 1–4

Do the statements 1–4 below agree with the information given in the following text? Write:

TRUE	if the text confirms the statement
FALSE	if the text confirms the opposite of the statement
NOT GIVEN	if it is impossible to know from the text

Exam tip: Look for synonyms for key terms.

Scientists from the UK and USA have recently reported that over the last 30 years the incidence of Type 2 diabetes has more than doubled. They estimate that nearly 350 million adults worldwide now have the disease. In every country studied, rates of diabetes had either remained the same or increased. The rise has been particularly acute in the Pacific Islands with up to thirty per cent of women in some areas suffering from the condition.

Type 2 diabetes is a chronic progressive condition which occurs when there is too much glucose in the blood, either because the pancreas does not produce enough insulin or because cells have become resistant to insulin. Complications resulting from diabetes include damage to kidneys, blindness, heart disease, and strokes.

The condition is associated with obesity; however, nearly three quarters of the rise has been attributed to longer lifespans and better diagnosis. Having a close relative with the disease is also a risk factor.

Type 2 diabetes has also become a major burden on health care systems around the world. Expenditure on treating the condition is projected to rise to over £30 billion annually within the next three years. However, a recent study has shown that if the condition is diagnosed within four years of onset, it can be reversed by following a low-calorie diet. Limiting food intake to 600 calories per day for eight weeks was shown to have a lasting effect on the majority of subjects who took part in the trial. For many, Type 2 diabetes can be cured – and it need not cost the earth.

- 1 More than twice as many adults have Type 2 diabetes as did thirty years ago.
- 2 Nearly a third of people in the Pacific Islands have diabetes.
- 3 Type 2 diabetes is a long-term illness which can be caused by insufficient insulin production.
- 4 The increase in Type 2 diabetes is partly due to greater life expectancy.

QUESTIONS 5–7

Complete sentences 5–7 using NO MORE THAN THREE WORDS from the passage above.

- 5 Treating diabetes places a significant _____ on health care budgets.
- 6 If a person _____ with diabetes early, he or she can be cured.
- 7 Most people _____ in the low-calorie diet study made a good recovery.

Exam tip: When writing in the IELTS exam, you need to use not only the right words but also the right parts of speech, for example:

Thompson and her colleagues analyse [verb] the samples using the antibody test.

The main results of the analysis [noun] are summarised below.

I have an analytical [adjective] approach to every survey.

When you learn a new word, learn its associated parts of speech.

3 The words in the table are commonly linked to academic study. Use your dictionary to complete the table.

verb	noun	adjective
claim		×
	definition	×
evaluate		
	investigation	
evidence	evidence	
	hypothesis	
		theoretical

4 Choose the correct part of speech from the words in italics for sentences 1–6.

- 1 When giving a presentation, it is important to *define/definition* key terms.
- 2 An effective essay is not just descriptive but also *evaluation/evaluative*.
- 3 It is important to *investigate/investigation* the causes of inequality.
- 4 It is now *evidence/evident* that stress contributes to disease.
- 5 Most scientific research begins with a *hypothesise/hypothesis*.
- 6 There is no *theory/theoretical* model to explain the impact of inflation on economic growth.

5 Choose words from the table in Exercise 3 to complete sentences 1–5.

- 1 In academic discussions, it is important to _____ arguments for their strengths and weaknesses.
- 2 It would be difficult to design a scientific experiment to test the _____ that multiple time dimensions exist.
- 3 To date, there is no _____ to support this theory.
- 4 After lengthy _____, they were still unable to identify the source of the leak.
- 5 There is no general agreement on a standard _____ of the term 'intelligence'.

Exam practice: Writing Task 2

Below is a student's answer to an IELTS Writing Task 2, in which candidates are required to write a 250-word essay on a given topic. Complete the essay with words from the unit. There may be more than one correct answer. Hint: make sure you choose the correct part of speech.

WRITING TASK 2

Write about the following topic:

Is there any value in studying academic subjects that are not 'useful' in terms of generating wealth for the country?

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Write at least 250 words.

Many people these days (1) _____ that a useful education is one that prepares graduates for occupations that create wealth. However, when we (2) _____ the usefulness of an academic subject, we should think carefully about how we (3) _____ the term 'useful'. In this essay, I argue that many academic subjects that do not directly generate great wealth can still be very useful.

Some subjects can be useful because they create knowledge that can be applied in related fields. (4) _____, for example, study the way language works. Their (5) _____ can be used to create more effective methods of language teaching. Improved international communication can result in better trading relations, which can in turn generate wealth. (6) _____ (7) _____ the lives of people in the past through their artefacts. Many of these will be displayed in museums, which can attract tourists who generate income for hoteliers, restaurants and so on.

Many academic subjects can also be 'useful' in terms of contributing to people's quality of life. Some people pursue hobbies in fields such as (8) _____ in order to have a better understanding of the planet we live on. Others with an interest in stars and planets may become amateur (9) _____. Curiosity is an important human trait, and many academic subjects allow people to satisfy this need.

In short, there is little (10) _____ that simply educating people to be efficient workers makes them happier or richer in the broader sense. Human curiosity and the unpredictable nature of knowledge creation mean that a variety of academic disciplines should be valued.

Now complete the essay in your own words.

Practice exercises

- 1 Listen to speakers 1–6 describing their adventures. Indicate which of the verbs a–f each speaker uses by writing a letter in the spaces below.

a accompany	Speaker 1 _____
b reschedule	Speaker 2 _____
c venture	Speaker 3 _____
d encounter	Speaker 4 _____
e overcome	Speaker 5 _____
f seek	Speaker 6 _____

Exam tip: You can improve your mark in the IELTS Speaking exam if you learn to pronounce words correctly.

For multi-syllable words, it is important to get the stress pattern right.

When you learn a new word, learn which syllable is pronounced most strongly.

Listen again to speakers 1–6 in Exercise 1. Underline the stressed syllable of each key verb a–f. Practise saying the words out loud.

Exam tip: In the IELTS Speaking exam, you need to show that you have a broad vocabulary.

In English, there are many words that have the same general meaning; however, they may have subtly different definitions.

Example: *Challenge* and *obstacle* can both refer to a difficulty. However, if you use the word *challenge*, you imply that you may be able to overcome the difficulty. If you use *obstacle*, you imply that the difficulty is harder to overcome.

Learn to distinguish these subtle differences of meaning to express yourself precisely.

2 Look at these pairs of words with similar meanings. Complete sentence pairs 1–8 with words from the table.

itinerary	journey
encounter	meet
pivotal	significant
seek	look for
intense	profound
dreary	dull
valuable	priceless
destination	goal

- 1 a You can use the expression _____ if you are trying to find something.

Exam practice: Speaking Part 2

In Part 2 of the IELTS Speaking exam, you have to speak for one to two minutes about a topic you are given. You will receive a task card like the one below. You have one minute to prepare what to say and to make a few written notes if you wish.

For this exam practice exercise, listen to the model answer and write down seven target words from Unit 4 that the speaker uses.

Describe an adventure that you have had, either at home or abroad.

You should say:

what you did

why you did it

how you felt about it

and explain what you learned from the experience.

When you are ready, try the exercise yourself. Before you speak, note down four to eight key words.

Exam tip: Make sure you have studied the definitions and sample sentences for your key words carefully.

Exam tip: Many words in English have more than one meaning.

You need to pay attention to the context so that you interpret words correctly.

Collocations (words that commonly go together) can help you recognise which meaning of a word is intended in that context.

Example: If you **convey goods** from one place to another, you carry or transport them. If you **convey a message**, you make it understood.

Learn to recognise collocations and the multiple meanings of words.

Exam tip: In the IELTS Reading exam, you may have to answer questions about the writer's attitude.

Writers often convey their attitude by choosing words which have positive, negative, or neutral connotations, for example:

If a writer describes a solution as *simple*, they mean that it is obvious and straightforward (positive connotation). If a writer describes a solution as *simplistic*, they are criticising it for being simpler than it should be (negative connotation).

Learn to recognise whether a word has a positive, negative, or neutral connotation.

- 1 Sentences 1–5 contain pairs of words in italics which are similar in meaning. Underline the word in italics which has the more positive connotation.

- 1 The shopping centre is normally *crowded/bustling* on a Saturday afternoon.
- 2 The roads are *busy/congested* during rush hour.
- 3 That housing scheme has won awards for its *novel/pioneering* design.
- 4 The city centre is surrounded by *extensive/sprawling* suburbs.
- 5 There are many *old/historic* buildings in the town centre.

Exam tip: In the IELTS Reading exam, you may have to show that you can identify the writer's main ideas by matching headings to sections of text.

The headings capture the main ideas, and the sections contain detailed information and examples. Superordinates (words that describe a group or category) can help you match headings.

For example, in the word set: *summer, season, winter, and spring*, the word *season* is the superordinate term because *summer, winter* and *spring* are examples of seasons.

Learn to recognise superordinate terms.

2 For each set of words or expressions 1–4, circle the superordinate term.

- | | | | |
|---------------------|------------------|----------------|----------------|
| 1 underground train | public transport | tram | commuter rail |
| 2 housing | flat | bungalow | council house |
| 3 library | leisure centre | park | amenity |
| 4 power supply | roads | infrastructure | communications |

3 Choose the correct superordinate term 1–3 for words a–h below. Write the correct number 1–3 next to words a–h.

- | | |
|----------|-----------------|
| 1 people | a commuter |
| 2 places | b immigrant |
| 3 events | c suburb |
| | d region |
| | e street party |
| | f resident |
| | g inhabitant |
| | h neighbourhood |

4 Read the paragraph below. Which of the superordinate terms 1–4 matches the words in bold?

- | | |
|--|--|
| 1 <i>Quantity</i> of food consumed in New York | 3 <i>Origin</i> of food consumed in New York |
| 2 <i>Quality</i> of food consumed in New York | 4 <i>Types</i> of food consumed in New York |

As in many urban areas, seventy per cent of the food consumed in New York is imported from **overseas**. Most of the remainder is produced in rural areas elsewhere in the **country**. Only a tiny percentage of food is produced in the **city** itself – mainly soft fruit and vegetables grown in patches of **ground** between buildings or on rooftop **gardens**. If New Yorkers used their green spaces more efficiently, they could produce up to twenty per cent of the fruit and vegetables they eat.

Exam practice: Reading – matching headings

The reading passage on the next page has 5 paragraphs, A–E.

Choose the correct heading for paragraphs B–E from the list of headings below. Write the correct number i–viii in spaces 1–4 at the top of the page.

NB There are more headings than paragraphs, so you will not use them all.

List of headings

- | | |
|--|--|
| i The quality of urban housing | v The urban-rural divide |
| ii Amenities in urban areas | vi The quality of rural infrastructure |
| iii The affordability of urban housing | vii Rural neighbourhoods in the city |
| iv The amenities that people want | viii Rural transport |

Example: Paragraph A Answer: v

- 1 Paragraph B _____
- 2 Paragraph C _____
- 3 Paragraph D _____
- 4 Paragraph E _____

The lure of the urban village

A

Many people dream of leaving the city and moving to the countryside, but in fact we are an overwhelmingly urban population. Over 80 per cent of UK residents now live in urban areas. Globally, it's much the same; according to the United Nations, by 2012, well over half of the world's population will be living in towns and cities.

B

Increasingly, people are living in towns, but what many really want is a piece of the countryside within the town. Three years ago, a survey of 1,000 homeowners in the UK found that many of those who were planning to relocate wanted to live near gyms, shops, and restaurants. Today, according to a more recent report, the majority want a crime-free neighbourhood, a back garden, and theatres or galleries within reach. The report concludes that Britons are becoming more concerned about their quality of life and are willing to prioritise tranquillity over status and salary.

C

However, what the report does not say is that, for people without a high salary, the chances of buying the ideal house, or indeed any house at all in the city, are becoming increasingly slim. According to recent figures, even if we take inflation into account, average urban house values are four times higher than they were 70 years ago. A comparison of average house prices and average incomes is even less favourable. Since 1940, home price rises have far exceeded rises in average salaries.

D

For those who can, moving to the countryside is an option. In most developed countries, the roads, power supply, and communication facilities are adequate for their needs. Indeed, improvements in telecommunications make telecommuting an increasingly attractive proposition.

E

Those forced to stay behind in urban life are increasingly yearning for neighbourhoods that are 'village-like' in feel. Indeed, those who market new homes are increasingly using such terms to attract buyers. Interestingly, the idea of urban villages is not a new one. The term was coined 50 years ago, by the American sociologist Herbert Gans in his study of the Italian-American communities of Boston. According to Gans, the communities he studied refashioned urban space in an attempt to recreate the intimate feel of the Southern Italian villages they came from. He argued that American cities as a whole could be seen as a patchwork of different villages in which non-urban immigrants attempted to shape the city to resemble the places in the old country that they had left behind. His findings may well resonate with today's native urbanites yearning for village life.

Practice exercises

Exam tip: In the IELTS Writing exam, you can demonstrate that you have a broad vocabulary by avoiding unnecessary repetition.

Many words commonly used in academic arguments have synonyms.

Example: The minister justified his position on arms control. He defended his position strongly when he gave evidence of the proliferation of nuclear weapons.

Learn to use synonyms when presenting your arguments.

1 Match each word 1–4 with its closest synonym a–d.

1 benefit	a disadvantage
2 debate	b discussion
3 drawback	c evidence
4 proof	d advantage

2 Find words in the text below which mean:

- | | |
|--|-----------------------------------|
| 1 recommend publicly (verb) | 4 explain in a general way (verb) |
| 2 accept the existence or truth of (verb) | 5 disapprove of (verb) |
| 3 proven to be reasonable or necessary (adjective) | |

There has been considerable debate among politicians over whether the use of force to protect human rights can ever be justified. Some advocate the use of arms as the only way of sending a clear message to oppressive regimes. Others object to the use of force on humanitarian grounds, arguing that it inevitably results in the loss of innocent lives. While it is important to acknowledge that there are compelling arguments on both sides, I would

suggest that a range of responses should be considered when there is proof that human rights are under threat. In this essay, I will outline three such responses.

Exam tip: In the IELTS Writing exam, you should make sure that you use words correctly.

Some of the words in this unit can be followed by:

a preposition, for example: *One of the benefits of the new phone is a larger screen.*

whether + clause, for example: *I doubt whether the new policy on care for the elderly can succeed.*

that + clause, for example: *We suggested that the working day should be reduced.*

a noun or noun phrase, for example: *They cannot justify their actions.*

Learn to use words correctly by studying example sentences.

3 Match the beginning of each sentence 1–5 with the most appropriate ending a–e.

- | | |
|-----------------------------------|---|
| 1 There has been some debate | a to the new motorway. |
| 2 The advertisers acknowledged | b over whether tuition fees should be increased. |
| 3 Campaigners have objected | c of the current system is that it rewards excessive risk-taking. |
| 4 One of the drawbacks | d whether the government's new policy on alcohol will work. |
| 5 Opposition politicians question | e that they had misrepresented their product. |

Exam practice: Writing Task 2

For the IELTS Writing Task 2, you are required to write a 250-word essay on a given topic using your own knowledge and experience.

First study the text from Practice exercise 2 as an example of how you might start your essay. Then read the dialogue below about freedom of speech. Use the words and expressions that you have learned in this unit in your response to the essay question below.

Dialogue

Peter: Of course there have to be limits to free speech! Even in the most democratic countries, it is illegal to incite hatred – I mean to encourage people to harm others, minority groups for example.

Felicity: I disagree. Free speech is essential. The ability to tolerate different points of view is the hallmark of a civilised society.

Karen: I think you're both right to an extent. There may have to be some limits, but only in extreme circumstances. Basically, I think you have to let people speak freely because if you don't, they may take to the streets and express their views in some possibly more destructive way – by rioting for example. Look at what happened in Eastern Europe in the 1980s and in the Middle East today.

Peter: Well, yes, I suppose you have a point there...

Karen: Also, if you look at history, there are plenty of examples of people who have been silenced for ideas that are now accepted as true.

Felicity: That's right! Take Galileo, for example, who said that the earth revolves around the sun. He was punished by the authorities for his views.

WRITING TASK 2

You should spend about 40 minutes on this task.

Write about the following topic:

Is freedom of speech necessary in a free society?

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Write at least 250 words.

A model answer is provided in the Answer key on page 107.

Practice exercises

1 Complete each sentence 1–6 with an appropriate word.

- 1 This mountain range was formed by l s millions of years ago.
- 2 Tropical storms and y s are common in the South Pacific at this time of year.
- 3 The Horn of Africa has been afflicted with severe g s for many years.
- 4 You need to be careful when swimming in these waters as there's a very strong r t.
- 5 The cost of repairing properties damaged by the l ran into billions of pounds.
- 6 We've been advised to board up the windows and stay indoors as the ur is approaching fast.

2 Read questions 1–4 about the words in Exercise 1. Then listen to Track 14 to find answers.

- 1 Is a hurricane more likely to cause a flood or a drought?
- 2 What is the difference between a hurricane and a typhoon?
- 3 Where might you find a glacier?
- 4 Where might you feel a current: in the air, in the water, in both air and water?

Exam tip: The prefixes *un-*, *in-*, *il-*, *ir-* and *dis-* are commonly used to make words negative.

Examples: *necessary* – *unnecessary*, *accurate* – *inaccurate*

Learning to recognise negative prefixes can help you work out the meaning of words.

3 Make words 1–5 negative by adding a prefix.

1 agree 4 legal

2 consistent 5 responsible

3 likely

Exam tip: Other prefixes that are also commonly used include:

prefix	meaning	example	prefix	meaning	example
col-	with,	<i>collaborate</i>			
com-	together	<i>combine</i>	vs.	ex-	<i>exclude</i>
con-		<i>conjoin</i>		from	<i>exhale</i>
over-	too much	<i>overstate</i>	vs.	under-	<i>understate</i>
pre-	before	<i>pre-industrial</i>	vs.	post-	<i>post-industrial</i>

Knowing the meaning of these prefixes can help you work out the meaning of unfamiliar words and their opposites.

4 Match prefixes 1–4 with word roots a–d.

- | | |
|---------|--------------------|
| 1 con- | a -pand |
| 2 ex- | b -estimate, -flow |
| 3 pre- | c -dense, -tract |
| 4 over- | d -historic |

5 Choose words from Exercises 3 and 4 to complete sentences 1–7. Make any necessary changes to verb forms.

- Water vapour _____ to form clouds.
- When water turns into ice, it _____.
- In _____ times, people endured ice ages, that is prolonged periods of intense cold.
- During the flooding, rivers and streams _____ their banks in countless places.
- Climate scientists came to different conclusions because the data was _____.
- Global warming is _____ to slow down in the near future.
- Politicians _____ over how to deal with climate change.

6 Listen to sentence pairs 1–4. Complete the table with the antonyms that you hear.

- 5 This object is normally about 5 or 6cm in length and can be used to secure a room.
 - a an electrical socket
 - b a light fixture
 - c a key
- 6 This is an object of variable length that may be used to suspend something from a height or to secure something such as a parcel.
 - a a piece of string
 - b a length of wood
 - c a pair of scissors

18

Choose an adjective a–e that best describes the place given by each speaker 1–5.

- a bustling b historic c rural d sprawling e urban

Speaker 1 _____

Speaker 4 _____

Speaker 2 _____

Speaker 5 _____

Speaker 3 _____

Listen to extracts 1–5 and indicate whether the statements below are True or False.

- 1 Speaker 1 justifies her decision to change her degree course. _____
- 2 Speaker 2 acknowledges that his study partner has been a great help. _____
- 3 Speaker 3 objects to the proposed increase in tuition fees. _____
- 4 Speaker 4 implies that degree courses are much easier than they were in the past. _____
- 5 Speaker 5 discusses the drawbacks of part-time study. _____

Then record yourself speaking for one minute in response to each question a–e:

- a What is the most difficult decision you have ever had to make?
- b Whose help and support would you most like to acknowledge and why?
- c Tell me about something that's happening in the world to which you strongly object.
- d To what extent has education in your country changed over the last 20 years?
- e What are some of the benefits and drawbacks of your place of work or study?

- 8 Read the passage below and underline words and expressions which are similar in meaning to expressions 1–6.

- | | | |
|-------------------|------------------------|--------------------|
| 1 were present at | 3 arranged | 5 take part in |
| 2 modern | 4 television and radio | 6 non-professional |

There is a popular belief that during hard economic times, people turn to entertainment for diversion and escape. If this were true, the entertainment industry should be booming. Figures released today suggest that it isn't.

Fewer people attended the cinema last year than in any of the preceding ten years. Theatre, dance, and live music, both classical and contemporary, saw similar declines, with not only lower attendance but also fewer events organised. Curiously enough, broadcast media have also failed to gain materially from the economic downturn. Audience figures for both radio and television programmes have remained broadly similar over the last three years.

There is, however, a silver lining to this cloud. Whilst fewer people appear to be attending cultural events, there has been a small but significant rise in the number of people choosing to participate in such activities. Amateur dramatics, poetry recitals, and debating societies have all enjoyed something of a comeback after many years of steady decline...

9 Listen again to Track 16, the lecture on global warming in the Exam practice section of Unit 9. Use the lecture notes below to write a response to this Writing Task 2 question.

Should the international community do more to tackle the threat of global warming?

Global warming today

In earlier studies:

- Some risk factors overstated, but some consequences understated

Risk factors:

- Sea levels expected to rise by 1m, not 2m
- Some glaciers and ice sheets contracting, e.g. Arctic; others expanding, e.g. Antarctic
- Gulf Stream unlikely to vanish

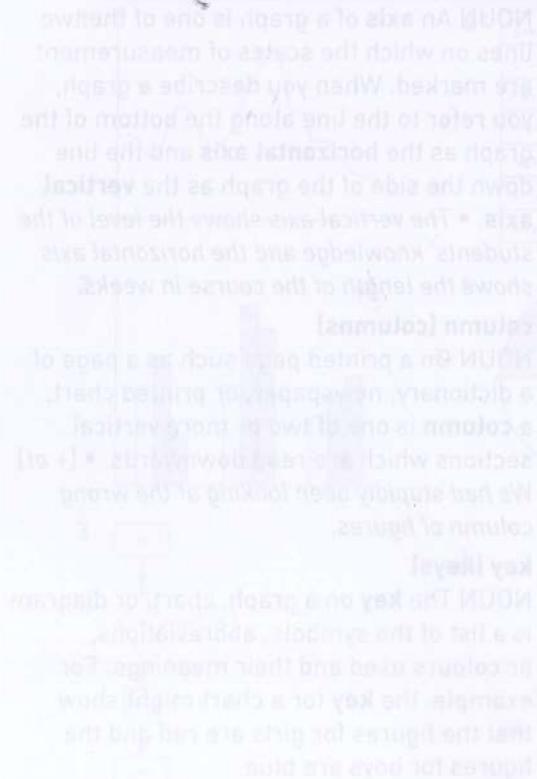

Consequences:

- Tropical forests more vulnerable to drought
- Hurricanes and typhoons more severe

Conclusion:

- Irresponsible to do nothing about the causes of global warming

A model answer is provided in the Answer key on page 108.

11 Describing Graphs or Figures

Nouns for types of graphs or figures | Nouns for components of graphs or figures |

| 3 column | 6 row | 9 vertical axis |

bar chart	diagram	flow chart	line graph	map	pie chart	table

Exam tip: For the IELTS Writing Task 1, you have to summarise information that is usually represented in the form of a table, a pie chart, a line graph, a bar chart, a diagram, a map, or a flow chart. You should write at least 150 words and organise your work carefully into three separate parts:

- An introductory paragraph briefly describing what the graph or figure shows (1–3 sentences)
- Body paragraph(s) highlighting the key information
- A concluding paragraph summarising the most important point (1–2 sentences)

4 Passages 1–7 are examples of introductory paragraphs of Writing Task 1. Complete the passages with words and expressions from Exercises 1, 2, and 3.

- 1 The _____ shows the online university application procedure. The process consists of six _____.
- 2 The _____ depicts the city of Milan. As can be seen from the _____, the dark shaded areas represent industrial zones, and the light shaded areas represent commercial zones.
- 3 The _____ compares the literacy levels of primary school pupils at age eleven in thirteen schools across the country. Attainment is indicated along the _____ axis, and the schools are listed on the horizontal axis.
- 4 The _____ illustrates how a telescope works. The _____ on the right show the direction of light as it passes through the lens.

- 5 The _____ shows the percentage breakdown of company employees by salary. There are five _____, each of which represents a salary range from £10,000 to £35,000.
- 6 The _____ represents the number of international students enrolled at Australian universities over a 30-year period. The vertical axis represents numbers of students in units of a thousand. The _____ axis lists the years between 1980 and 2010.
- 7 The _____ gives data for accident and emergency hospital admissions. There are five _____ representing the five most common reasons for hospital admission and seven rows giving figures for seven different city hospitals.

Exam tip: Certain standard words frequently appear in Writing Task 1, for example:

The graph shows... The number of ... decreased.

Show that you have a broad vocabulary by using synonyms where possible, for example:

The number of hours worked decreased slightly between 1985 and 1990, levelled off, then dipped again briefly in 1997.

- 5 Look again at passages 1–7 in Exercise 4. Underline five words or expressions which are used as synonyms for the word 'shows'.

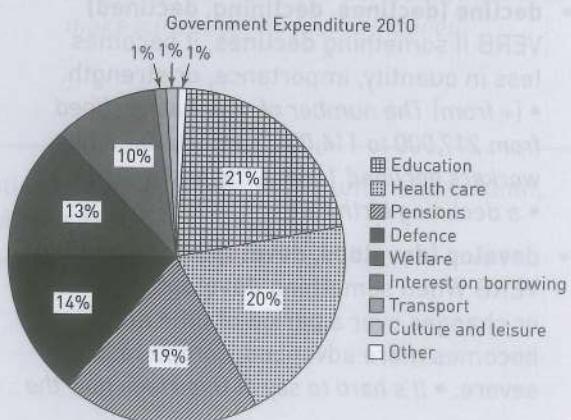

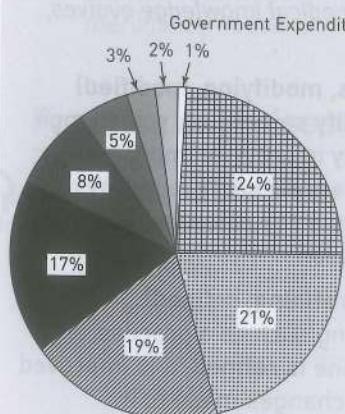

Exam practice: Writing Task 1

Writing Task 1

You should spend about 20 minutes on this task.

The charts below show local government expenditure in 2000 and 2010.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

A model answer is provided in the Answer key on page 108.

Practice exercises

- 1 Listen to candidates 1–6 answering questions about changes. In the left-hand column, write which verb a–f is used by each candidate 1–6.

Candidate 1 _____	a abandon _____
Candidate 2 _____	b adjust _____
Candidate 3 _____	c decline _____
Candidate 4 _____	d develop _____
Candidate 5 _____	e evolve _____
Candidate 6 _____	f modify _____

Exam tip: Similar words can have a positive, negative or neutral meaning, depending on the context they are used in.

Example: The words *intricate*, *complicated*, and *complex* can all be used to describe something that has many parts. However:

Intricate usually has a more positive connotation and is often used to describe decorative objects:

The fireplace was carved with intricate patterns.

Complicated usually has a more negative connotation and is often used to describe situations that are difficult to understand or deal with:

The situation in Lebanon is very complicated.

Complex is generally more neutral in tone and is often used to describe things that are challenging to understand:

These complex machines can perform a variety of tasks.

Learning to use words with positive, negative, and neutral connotations can help you express your ideas and attitudes more effectively.

- 2 Listen again to candidates 1–6 in Exercise 1 on Track 20. Indicate whether the verbs a-f in Exercise 1 have a positive, negative or neutral connotation in that context by writing +, – or 0 next to each verb.

- 3 The words below all refer to periods of time. Rewrite them in order beginning with the shortest time period and ending with the longest.

century	decade	generation	millennium	year
---------	--------	------------	------------	------

- 4 Verbs 1–5 below can also refer to changes. Indicate whether they usually have a positive, negative or neutral connotation by writing +, – or 0 in the spaces. Then listen to speakers 1–5 to check your answers. Listen again and write the time expression each speaker uses which includes the words from Exercise 3.

word	connotation	time expression
1 alter		five centuries ago
2 diminish		
3 refine		
4 shift		
5 transform		

- 5 Use words from Exercises 1–4 to talk about changes in your own country. Use words with a positive connotation to talk about positive changes. Use words with a negative connotation to talk about negative changes. Use neutral verbs for changes that you feel are neither positive nor negative.

Exam tip: Improve your pronunciation by focusing on problem consonants.

Depending on your language, these may include:

- consonants which come at the end of a word, for example: *develop*
- groups of consonants with no vowels between them (consonant clusters), for example: *evoke*
- closely related consonant sounds, for example: /b/ and /v/; /l/ and /r/; /s/ and /θ/

Practise saying words which end with consonant sounds.

Practise saying words with consonant clusters until you can say them without adding extra vowels.

If you have difficulty differentiating between two sounds, practise repeating word pairs which only differ in those sounds, for example, for /l/ and /r/, practise saying *light* and *right*.

- 6 Listen to Track 22 and repeat words 1–15. Identify words with problem consonants and practise saying them until you can pronounce them clearly.

Exam practice: Speaking Part 3

Exam tip: In Part 3 of the IELTS Speaking exam, you have to discuss the topic of Part 2 with the examiner.

The examiner will ask you questions that will allow you to analyse issues and express opinions.

Some of these questions may require you to compare past and present and to speculate about future changes.

Learning to talk confidently about change can help you perform well in Part 3 of the Speaking exam.

- For this exam practice exercise, you will hear three questions related to the topic of Unit 4: Adventure. Record yourself answering the questions.

Listen to your responses and answer questions 1–2 below.

- 1 Have you conveyed your attitude effectively by correctly using words with positive, negative, and neutral connotations?
- 2 Have you pronounced consonant sounds clearly?

Listen to the sample answers and try the exercise again.

- 5 The company's insolvency **stems from** a series of poor decisions made five years ago.
- 6 His statements about corruption in the police **provoked** an immediate response.

Exam tip: You do not need to know all of the vocabulary in the IELTS Reading exam.

You can often work out the meaning of a word by looking at the context. If you do not understand a word or expression, you can look for:

- a a superordinate term; for example, if you don't understand *endives*: *Britons these days eat endives, rocket, and sprouting broccoli, vegetables that a generation ago were unheard of.*
- b examples; for example, if you don't understand *artefacts*: *Artefacts, such as tools, jewellery and containers, can help us understand ancient civilisations whose history is not recorded in writing.*
- c a synonym or definition; for example, if you don't understand *drowsiness*: *This drug can induce drowsiness, that is difficulty staying awake.*
- d an antonym; for example, if you don't understand *anxious*: *Some children can be relaxed at home but anxious at school.*

- 2** For each sentence 1–4, use the context to write the meaning of the words in bold.
 Underline the words that help explain the words in bold and indicate whether they are:

- a a superordinate term
- c a synonym or definition
- b an example
- d an antonym

- 1 We saw that whereas the original photo showed the complete scene, the published version had been **cropped**.
 - 2 Air quality can be improved through greater use of **catalytic converters**, devices which reduce pollution generated by cars.
 - 3 Rocket launchers, **grenades** and other weapons were discovered under the floorboards.
 - 4 Some researchers have employed a **flawed** methodology, for example, failing to adequately consider significant variables.
- 3** Words and expressions 1–9 all appear in bold in the reading passage. Study the context in which they appear and circle the meaning a or b in the table which best defines the word or expression as it is used in the passage.

Birth Order and Personality

The belief that birth order has a lasting **impact** on personality is widespread and frequently referred to in popular psychology literature. Alfred Adler (1870 – 1937), an Austrian psychotherapist, was one of the first to argue that birth order **contributes** to the formation of character. He **maintained** that firstborn children could often be profoundly affected by the loss of status brought about by the birth of siblings. Eldest children, according to Adler, **were prone to** be both anxious and conscientious, that is, inclined to work hard, perhaps in order to regain a position of **primacy** within the family.

Since Adler, there have been numerous attempts to verify the **influence** of birth order on a range of personality **traits**, in particular: rebelliousness, conscientiousness, extroversion, agreeableness, and anxiety. Some studies have found that last born children tend to be more extrovert and **agreeable**, that is, they not only seek out the company of others but also tend to get along well with other people. Middle children, on the other hand, are least likely to be **compliant**. They tend to rebel, perhaps in an attempt to define themselves as 'special' in relation to their more conscientious elder siblings and agreeable younger siblings.

1 impact	a cause	b effect
2 contributes to	a is one of the causes of	b is one of the effects of
3 maintained	a denied	b believed
4 were prone to	a had a tendency to	b were unlikely to
5 primacy	a greatest importance	b least importance
6 influence	a effect	b cause
7 traits	a problems	b characteristics
8 agreeable	a agree with the opinions of others	b relate well to other people
9 be compliant	a obey others	b disobey others

Exam tip: If you have to answer multiple-choice questions, before you read the text, read the stem of each test item and underline key words.

This will help you identify the part of the text that you need to read carefully in order to select the correct option A–D.

Example: For Q5 on the next page, you should underline 'Adult'. When you read the text, look out for the word 'adult' (or a synonym) and read that part of the text carefully.

Exam practice: Reading – multiple choice

QUESTIONS 1–5

Look at the passage below. Choose an appropriate letter A–D to finish sentences 1–5.

- 1 The term 'Four-legged Pharmaceutical' in the title refers to

A pets that cause illness.	C pets that need medicine.
B pets that improve health.	D pets that give medicine.
- 2 Asthma is probably

A a health disorder.	C linked to higher rates of school attendance.
B a sign of good health.	D linked to growing up with pets at home.
- 3 A 'risk-free' relationship is one that

A pet owners offer their pets.	C is not related to success or position.
B you have to work hard to achieve.	D is linked to status but not success.
- 4 You are less likely to suffer from asthma if

A you have contact with dogs.	C you stay away from dogs.
B you have contact with cats.	D you stay away from cats.
- 5 Adult pet owners

A do not experience benefits.	C experienced the same benefits as children.
B experienced only limited benefits.	D also benefited from pet ownership.

Four-legged Pharmaceutical

Recent research suggests that pet ownership has some surprising benefits for children. The study of 256 children in three UK schools found that pets were linked to a 20% reduction in the number of days children were off sick from school. According to Dr. June McNicholas, former lecturer and world expert on human-animal interaction, owning a pet can have a positive influence on immune system functioning. She found that children who grew up in households with pets had a lower risk of developing allergies and asthma in later life.

Pets also make children happier. They are associated with improved psychological well-being, which in turn impacts positively on physical health. Physically disabled children with pets, guide dogs for example, were found to experience even greater health benefits. Pets offer psychological support and a 'risk-free' relationship, a relationship not determined by achievements or status.

The study did not find significant differences between owning a cat and owning a dog, though it is possible that exposure to cats resulted in slightly better immune functioning. This confirms the results of an earlier American study which found that cats were more effective than dogs in reducing rates of asthma.

Other studies have shown that these health benefits are not limited to children. A groundbreaking Australian study found that adults who own pets had lower blood pressure and cholesterol levels. These results were confirmed by American researchers who found that the positive effects of pet ownership on blood pressure were long-lasting. Access to pets can also reduce the severity of depression among hospital patients and help ease the misery of bereavement.

Practice exercises

1 Match the beginning of each sentence 1–6 with the most appropriate ending a–f.

- | | |
|---|--|
| 1 Employment opportunities for graduates have declined; | a prior to the granting of planning permission. |
| 2 He explained the terms 'biosphere' and 'ecosystem'; the former refers to the atmosphere, water and land where life occurs and | b moreover, the poorest ten per cent should be given immediate assistance. |

3 Steps should be taken to raise the living standards of all families living below the poverty line;	c whilst in most industrialised countries, the majority of pupils study the subject until the age of 18.
4 In the United Kingdom, only 15 per cent of pupils pursue mathematics beyond the age of 16,	d thus, women suffer disproportionately when there are cuts in government expenditure.
5 There must be a thorough assessment of the environmental impact of the new development	e nevertheless, young people continue to aspire to a university education.
6 A higher proportion of women work in the public sector;	f the latter refers to the interaction between living things and their environment.

2 For each sentence 1–6 above, write a letter a–d indicating whether a point has been:

- a added
- b contrasted
- c sequenced (put in order)
- d shown as a consequence

Exam tip: Learn how signposting words are used. Pay attention to the grammar and punctuation of the example sentences below.

The adverbs *furthermore*, *moreover*, *nevertheless*, *thus* and *hence* link two sentences or clauses.

Nursing homes are very costly. Moreover, they often fail to provide adequate levels of care. Grown-up children frequently settle in other cities; hence, the elderly often find themselves without family nearby.

Use *nevertheless* when you want to emphasise that the idea in the second sentence or clause is contrary to what the reader would expect from the first.

He knew he had lost the race. Nevertheless, he pressed on until the finish line.

The conjunctions *whereas* and *whilst* are used to contrast information within a sentence.

Dogs like company, whereas most cats prefer to be on their own.

3 For each sentence 1–6, underline the word in italics that can be used to complete the sentence.

- 1 He worked casually for several years *prior/initial* to receiving a proper job contract.
- 2 Many independent film makers achieve critical success; *whilst/nevertheless*, they often find it difficult to raise funds for future projects.
- 3 At first, we decided that, *hence/on balance*, starting a business would be a worthwhile experience.
- 4 His *subsequent/respectively* book was not as good as his first.
- 5 The west of the county has a tropical climate, *whereas/nevertheless* the east is quite arid.
- 6 Ireland and Greece joined the European Union in 1973 and 1981 *latter/respectively*.

Exam tip: Learn the different types of sequencing words and how they are used. *Former, initial, prior, latter and subsequent* are adjectives and can be used to modify nouns. Examples: *My former wife is in town.* Jane's *initial response to the news was quite positive.* *Former* and *latter* are also pronouns which can be used in place of nouns mentioned previously. Example: *Jim saw both cheetahs and lions. He was able to photograph the former but not the latter.* *Respectively* is an adverb which usually comes at the end of a sentence. Example: *For English and mathematics, he was awarded an A and a B respectively.* *Prior to* is a formal phrase that can be used in place of the preposition *before*. Example: *The patient had been well prior to the operation.*

- 4 Complete the passage with words from this unit. For some gaps, there may be more than one possible answer.

Studying abroad has become increasingly challenging over the last year or two. Visa regulations have become more complex and the cost of travelling abroad has increased substantially. (1) _____, record numbers of students have applied for a place at a university overseas. When international students first arrive in the new country, their (2) _____ impression is often favourable. However, their (3) _____ impressions can be less so, as they struggle to adapt. International students need time to adjust to the new study environment; (4) _____, they need help with that process. Decisions about how best to help international students will depend on their needs. Undergraduate and postgraduate students are very different; the (5) _____ may need an introduction to essay writing; the latter more advanced training in critical thinking skills. The student's subject is also a factor to be born in mind. Good numeracy skills are needed for engineering for example, (6) _____ good literacy skills are needed for courses such as law.

Exam practice: Writing Task 2

The essay introduction below has been written in response to the Task 2 question:

Increasing numbers of students are choosing to study abroad. To what extent does this trend benefit the students themselves and the countries involved? What are the drawbacks?

Rewrite the introduction by replacing the words in bold with signposting words from this unit. Make any necessary changes to punctuation. Then complete the essay in your own words using appropriate signposting words where necessary.

Write at least 250 words in total.

Studying abroad has become increasingly common in the last few years, especially for young people from countries such as China and India. Many students and their families clearly consider the experience worth the sacrifices involved. **Students** often give up friendships when they move abroad; **families** often use their life savings. And many governments are willing to invest huge sums of money in sponsoring their young people to study in universities overseas. However, this trend has drawbacks as well as benefits for those concerned.

A model answer is provided in the Answer key on page 110.

| Examiner: | Tell me about the house or flat you live in. |
| Candidate: | I'm living in my aunt's flat at the moment. I've provisionally arranged to stay there until I complete my studies. It's a relatively small flat, approximately 70 square metres, and on the top floor of a four-storey building. |
| Examiner: | How do you feel about living there? |
| Candidate: | Ideally, I'd like a bigger flat, but it'll do for now. I wouldn't want to stay there indefinitely as it's a long commute to my university. |
| Examiner: | Is the decoration or appearance of the place you live important to you? |
| Candidate: | Not particularly. As long as it's clean and comfortable, I'm happy. |
| Examiner: | When choosing things for your flat, is the appearance of an object more important to you than how well it works? |
| Candidate: | Not necessarily. I prefer objects that are well designed, which to me, means things that are both functional and attractive. |

2 Match adverbs and expressions 1–7 below with the adverbs you underlined in Exercise 1.

- 1 especially
- 2 preferably
- 3 temporarily/for the time being
- 4 without a fixed time limit
- 5 always/definitely
- 6 roughly
- 7 comparatively

Exam tip: Use an adverb at the beginning of a statement to indicate your attitude towards it.

Example: *Fortunately, I was able to fund my studies myself.*

- 3 For each sentence 1–7, replace the expression in italics with the most appropriate adverb a–g. Listen to Track 28 to check your answers.

- | | |
|-----------------|----------------|
| a absolutely | e supposedly |
| b inevitably | f surprisingly |
| c interestingly | g undoubtedly |
| d presumably | |

- 1 *I didn't expect this* – the prime minister has been elected for a second term.
- 2 *I was intrigued that* more young people voted in this election than in the previous one.
- 3 *Yes, of course!* I'd love to return to Africa some day.
- 4 *People claim that* travel broadens the mind.
- 5 *I'm sure that* cooking with natural ingredients is better for your health.
- 6 *We cannot avoid the fact that* the cost of fuel will rise.
- 7 *I assume* fewer people will travel by car if petrol becomes too expensive.

Exam tip: The most common sound in English is the schwa.

It occurs in unstressed syllables and in writing, it can be represented by any vowel.

Examples: *above, better, pencil, contain, suppose*

To pronounce it, you should relax your jaw and make the briefest possible vowel sound.

- 4 Listen to words 1–6 below on Track 29. Put square brackets around the vowel which is stressed and underline any vowels pronounced as a schwa. Say the words.

- | | |
|----------------|----------------|
| 1 absolutely | 4 presumably |
| 2 necessarily | 5 supposedly |
| 3 particularly | 6 surprisingly |

- 5 Listen to the examiner's questions in Exercise 1 on Track 30, pausing the CD after each question. Answer the questions in your own words using adverbs where appropriate.

Exam practice: Speaking Part 1

Exam tip: Using attitude markers such as *surprisingly*, *interestingly*, and *inevitably* can make your responses more interesting. However, if you overuse them or use them inappropriately, you will not sound natural.

It is advisable that you notice how proficient and in what contexts speakers use them. Also, you should avoid using them in every sentence.

31 You are going to practise Part 1 of the IELTS Speaking exam: introductions and general questions.

You will hear the examiner introduce herself, ask you to confirm your identity, and ask you questions on a variety of topics.

This part of the exam takes 4–5 minutes.

As you do this exam practice exercise, pause the CD after each question so that you can answer. You may want to record yourself, assess your performance, and try again.

Sample answers to the questions are in the Answer key on page 110.

- 3 They're very much in love, but he lives in San Francisco, and she lives in London. That certainly makes things difficult. _____
- 4 My passport's expired and I've got to send it off to be renewed. But I need to present my passport to the examiner in order to sit the test next week. What an impossible situation! _____

32

2 Listen to each speaker 1–5 describing a problem. Complete each sentence 1–5 with the most appropriate word a–e.

- a crisis
- b damage
- c deterioration

- d dilemma
- e predicament

- 1 The speaker is angry about _____ to her car.
- 2 The speaker is concerned about the _____ in her grandmother's health.
- 3 The speaker complains about a _____ that he's in.
- 4 The speaker is experiencing a _____ and needs help.
- 5 The speaker is struggling with a _____.

33

3 For each sentence 1–5, underline the word in italics that best collocates with the word in bold. Listen and check your answers.

- 1 Don't worry. The **damage** to your car can be easily *resolved/repaired*.
- 2 I'm sure you'd like to do more to *intervene in/alleviate* her **suffering**.
- 3 If you speak to the manager, she may be able to *resolve/react to* your **predicament**.
- 4 I'll be right over! That's not a **crisis** you should *tackle/eradicate* on your own.
- 5 You're never going to *repair/resolve* that **dilemma** until you decide what you really want.

4 For each sentence 1–6, underline the word in italics which has a more moderate meaning.

- 1 If you make the wrong choice, you could **damage/destroy** your career.
- 2 Management have promised to *solve/address* the problem of falling productivity.
- 3 The government has pledged to *tackle/eradicate* child poverty by 2025.

- 6 Employing nurses from overseas may *alleviate/resolve* the skills shortage in the short term, but more needs to be done for the longer term.

Exam tip: For questions in the Listening exam which require you to write short answers:

You should use exact words that you hear in the recording.

In addition, you have to make sure that you spell the words correctly.

5 Underline and correct the nine words which have been misspelled in the paragraph below.

Culture shock can be defined as the difficulty people experience when adjusting to a new culture that is significantly different from their own. There are no fixed symptoms associated with culture shock as each individual reacts to the experience in his or her own way. However, the shock of moving to a foreign country is often seen as consisting of distinct phases. There is often an initial period of enthusiasm and positive feeling, sometimes referred to as a 'honeymoon phase', followed by a period of growing frustration and anxiety. Over time, the newcomer enters a third phase, a period of adjustment, during which new coping skills are developed. Finally, there is a period of acceptance – the individual can operate in the new environment with ease.

There is no set way of approaching the problem of culture shock. Evidence suggests that each person learns to cope with the transition in his or her own way. However, the unpleasant symptoms associated with the more difficult phases can be alleviated by a few simple measures: rest, good nutrition, and plenty of social contact.

Exam practice: Listening – short-answer questions

Exam tip: For any question which requires you to write an answer, follow the instructions exactly.

If the instructions tell you to write no more than three words, you can write one, two or three words.

If you have to write more than three words to answer the question, you have probably chosen the wrong information.

4 The negotiators decided to stick with the original framework for peace... **d** ...as the evidence against him was compelling.

- 4** Complete the table below with the missing parts of speech.

noun			concept		dogma	
adjective	ambiguous	biased		credible		valid

Exam tip: In the IELTS Reading exam, you may have to complete gaps in a summary with words from a reading passage. Recognising which part of speech is required in a gap can help you do this.

Example: *He won the argument because he was able to present the most _____ evidence.*

In this sentence, the gap comes before a noun, so it is likely to require an adjective.

*He won the argument because he was able to present the most **credible** evidence.*

- 5** Complete the summary with words from the text underneath. Use each word once only.

Many educators have tried to devise a (1) _____ for understanding the reading process. Some maintain that readers use a 'bottom-up' approach. Others have questioned the (2) _____ of this view, arguing instead that readers use a 'top-down' strategy based on their understanding of the reading passage context. However, this (3) _____ also has (4) _____.

The reading process

Educators have made numerous attempts to develop a framework for making sense of what goes on in the mind of the reader in the process of reading a text. Some believe that readers build up an understanding of a text from the 'bottom-up', that is, they decode individual words first, then sentences, then paragraphs and so on. Critics have cast doubt on the validity of this model by pointing out, for example, that readers can often understand texts which have words missing.

Those who adopt an alternative stance maintain that readers employ a 'top-down' approach to reading. They believe that readers use their understanding of the overall context of the reading passage to work out the meaning of individual words, phrases, and sentences. However, flaws have also been identified in this perspective. It is obvious, for example, that it would be impossible for readers to read a text written in a language completely unknown to them, however much they knew about the context.

Exam practice: Reading – completing a summary

QUESTIONS 1–6

Complete the summary with words from the reading passage underneath. Use NO MORE THAN THREE WORDS for each answer.

Summary

For many years, (1) _____ have tried to define the concept of humour but failed to reach a (2) _____. Although numerous (3) _____ of humour have been identified, three main categories are commonly recognised: superiority, (4) _____. Proponents of the superiority model believe that people see humour in the (5) _____ of others. However, this interpretation is not always (6) _____.

What is humour?

We all recognise it when we see it, but do we really know what it is? For over 2,500 years, philosophers and psychologists have tried to answer this question; however, there has been little consensus to date over what, in essence, constitutes humour. Indeed, some scholars have identified as many as 100 distinct theories of humour in the literature on the subject.

The standard analysis classifies theories of humour into three broad categories: superiority, relief, and incongruity. The superiority theory can be traced back to the ancient Greek philosophers Aristotle and Plato, who maintained that we laugh at the misfortune or inferiority of others: the ugly, the ill-educated, and the uncouth. According to this framework, our sense of superiority brings about a feeling of joy or pleasure. Whilst this may explain some instances of humour, it is clearly not valid in every case: we can often feel superior to something, an insect for example, without finding the situation funny.

Relief theorists, on the other hand, propose a 'tension-release' model to the problem of humour. Proponents of this approach see laughter as a release of nervous or pent-up energy. The psychoanalyst Sigmund Freud, for example, noted that jokes often touch on taboo subjects such as infidelity or death. He believed that laughter is a release of psychic energy that would normally be used to suppress awareness of uncomfortable subjects. However, this theory too has its flaws. Some critics have pointed out that the failure to distinguish between laughter (a physical response) and humour (a concept relating to thought or feeling) has resulted in unhelpful ambiguity.

This brings us to the third category: incongruity theories of humour. According to this framework, humour occurs when there is a sudden resolution of a mismatch between expectation and reality. Puns, jokes which play on the double meaning of words, are a good illustration of this view. For example, 'I needed a password of eight characters long, so I picked Snow White and the Seven Dwarves' plays on the dual meaning of the word 'character'. In the first part of the sentence, the listener develops the expectation that 'characters' refers to letters of the alphabet. The humorous twist occurs when the teller reveals that he has, in fact, chosen his password characters (fictional people) from a well-known animated film. While incongruity theories of humour are generally seen as having the greatest credibility, they too have their critics. Experience tells us that some incongruities – finding a shoe in your refrigerator, for example – may simply be experienced as perplexing or uncomfortable.

What can one conclude from this? Perhaps only that whilst each of these approaches can explain some instances of humour, no single one has captured every aspect of this most elusive quality.

- **seemingly**

ADVERB You use **seemingly** when you want to say that something seems to be true. ▪ *He moved to Spain, seemingly to enjoy a slower style of life.*

Practice exercises

Exam tip: In the IELTS Writing exam, you can use words such as *vast* and *marginally* to present facts, figures, or trends effectively.

Some adjectives and adverbs convey the idea of 'big', 'very' or 'a lot'.

Example: *Vast amounts of money have been spent on IT projects that have proved unworkable.*

Other adjectives and adverbs convey the idea of 'small' or 'a little'.

Example: *The percentage of students studying science and engineering was marginally higher last year than it has been in the previous ten years.*

1 For each sentence 1–5, circle the words in bold which are similar in meaning to *big* or *a lot of*. Underline the words in bold which are similar in meaning to *small*.

- 1 There is abundant evidence that wearing a seatbelt reduces the risk of serious injury from automobile accidents.
- 2 There was a negligible rise in unemployment in the last quarter.
- 3 We have ample proof that the stolen money is being held in an off-shore account.
- 4 There is a marked difference between urban and rural areas in terms of job losses.
- 5 There was a modest increase in exam pass rates last year.

Exam tip: In the Writing exam, you should also indicate how certain you are about the facts and opinions you present.

If you want to express a high degree of certainty, use words like *conclusive*.

Example: *Astronomers were able to present conclusive evidence that the universe is expanding.*

If you want to express doubt, use words like *apparently*.

Example: *He was apparently calm when he discovered the damage to his car.*

2 For each sentence 1–5, circle the word or expression in italics that makes the stronger claim.

- 1 Based on the evidence available to date, we have come to the *tentative/definitive* conclusion that smaller class sizes improved pupils' educational attainment.
- 2 The evidence that smoking increases the risk of lung cancer is *undisputed/strong*.
- 3 It has been *reported/confirmed* that the royal wedding will take place in August.
- 4 Heavily indebted companies *will/are liable to* fail in the current economic climate.
- 5 The workers were *seemingly/known to be* contented with the changes to their working conditions.

3 For each sentence 1–6, cross out the word a–c which does not collocate with the word in bold.

- 1 Psychologists have come to a/an _____ conclusion that children of working mothers are not educationally disadvantaged.

a tentative	b ample	c definitive
--------------------	----------------	---------------------
- 2 There is _____ evidence that genetically engineered foods are safe to eat.

a abundant	b ample	c marked
-------------------	----------------	-----------------
- 3 Recent government reforms had a/an _____ effect on the budget deficit.

a abundant	b negligible	c modest
-------------------	---------------------	-----------------
- 4 The graph shows that there has been a/an _____ increase in the average daily consumption of fresh fruit and vegetables.

a marked	b modest	c abundant
-----------------	-----------------	-------------------
- 5 Negotiators for the two countries have reached a _____ agreement on how to resolve the border dispute.

a tentative	b definitive	c vast
--------------------	---------------------	---------------
- 6 The rebels have obtained _____ supplies of weapons.

a vast	b abundant	c marked
---------------	-------------------	-----------------

4 For each sentence 1–5, replace the word in bold with one of the key words from this unit.

- 1 If my boss comes under any more pressure, she's **likely** to explode.
- 2 Because of more effective policing, there has been a **noticeable** decrease in youth crime.
- 3 Job prospects for graduates have improved **slightly** over the last six months.
- 4 People who gamble **rarely** win more than they lose.
- 5 No one has been able to give a **conclusive** answer to the question of why some people seem to be consistently luckier than others.

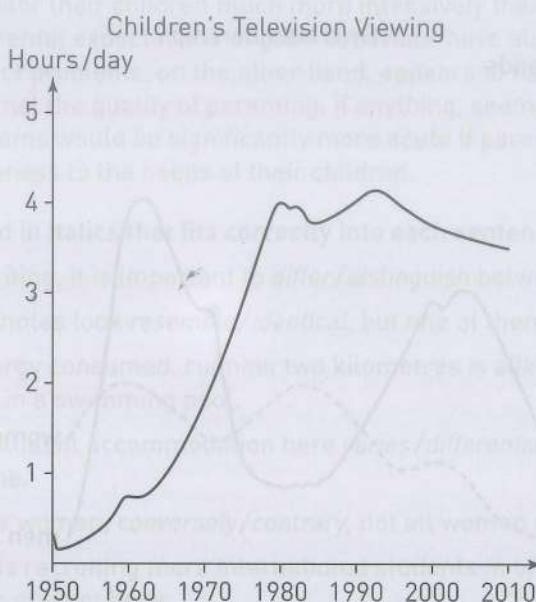

Exam practice: Writing Task 1

Use adjectives and adverbs of quantity and degree to complete the report below.

The graph below shows the number of hours per day on average that children spent watching television. The graph covers the period between 1950 and 2010.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

- 3 Underline the word in italics that fits each sentence 1–7 below.
- 1 In academic writing, it is important to distinguish between fact and opinion.
 - 2 These two CEO roles look very similar, but one of them is a fake.
 - 3 In terms of energy output, running two kilometers is akin/given/subject to swimming four lengths.
 - 4 The quality of 800000 pieces of paper here varies/differentiates, but the price is more or less the same.
 - 5 All mothers are equally/consistently/contrary, not all working mothers.
 - 6 The university is quite/very/relatively distinct/diverse.
 - 7 The two dancers were both good, though they were quite different, but the younger one was much more energetic.

- 1 difficult to find under the sun
- 2 more women in men's jobs
- 3 lack of employment opportunities
- 4 difficulties in the economy
- 5 growth of living standards
- 6 too much cleaning

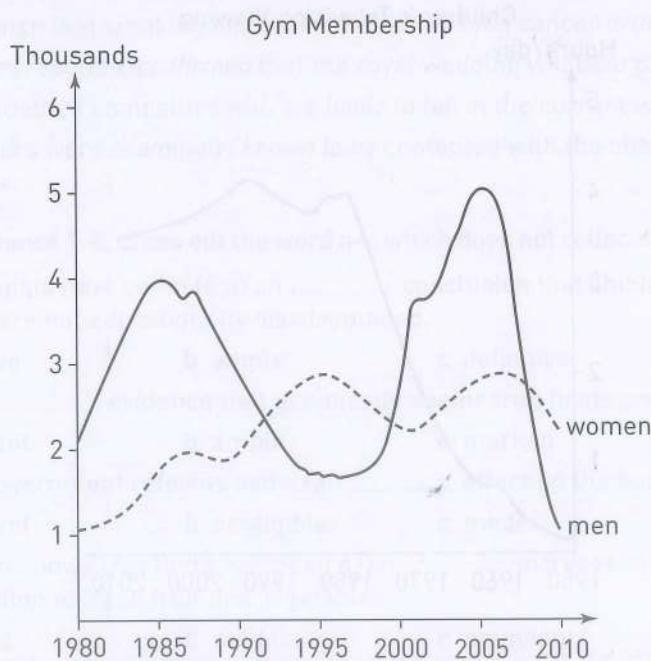

A model answer is provided in the Answer key on page 112.

20 Revision 2

Vocabulary revision (Units 11–19)

Practice exercises

- 1 Write an appropriate word in each blank space of the Writing Task 1 introduction based on the figure below. Then complete the report in your own words.

The line (1) _____ shows male and female gym membership over a thirty-year period. The (2) _____ axis represents the number of members in units of 1,000. The (3) _____ axis represents the period from 1980 to 2010.

A model answer is provided in the Answer key on page 112.

- 2** Read the passage below and underline words and expressions which are similar in meaning to expressions 1–6.

- | | | |
|-----------------|---------------------|--------------------------|
| 1 deterioration | 3 changed gradually | 5 barely changed |
| 2 giving up | 4 forty years | 6 about thirty years ago |

The aim of this study was to critically assess the popular belief that a decline in the quality of parenting is largely responsible for the reported rise in anti-social behaviour among young people. The study was undertaken in response to numerous articles in the popular press and elsewhere criticising parents for abandoning traditional child-rearing practices. The authors' findings suggest that parenting styles have indeed evolved over the past four decades, though not in the way one might expect. According to the researchers, parents today monitor their children much more intensively than they did a generation ago; moreover, parental expectations of good behaviour have also steadily increased. The incidence of conduct problems, on the other hand, appears to have hardly altered. The authors conclude that the quality of parenting, if anything, seems to have improved, and that conduct problems would be significantly more acute if parents had not developed greater responsiveness to the needs of their children.

- 3** Underline the word in italics that fits correctly into each sentence 1–7 below.

- 1 In academic writing, it is important to *differ/distinguish* between fact and opinion.
- 2 These two £50 notes look *resemble/identical*, but one of them is a fake.
- 3 In terms of energy consumed, running two kilometres is *alike/equivalent* to swimming twenty lengths in a swimming pool.
- 4 The quality of student accommodation here *varies/differentiates*, but the price is more or less the same.
- 5 All mothers are women; *conversely/contrary*, not all women are mothers.
- 6 The university is recruiting more international students in order to create a more *distinct/diverse* student body.
- 7 The two dancers were *comparable/compare* in terms of technique, but the younger one was much more expressive.

35

- 4** Listen to sentences 1–7 and indicate whether the expressions below are causes or consequences.

- 1 reduced government expenditure
- 2 drilling for oil under the sea
- 3 more women in 'men's' jobs
- 4 lack of employment opportunities
- 5 success in life
- 6 alarm in farming communities
- 7 too much cleaning

5 Combine each pair of sentences 1–6 below using the word or expression in brackets.
Make any other necessary changes.

- 1 She knew she did not have the right qualifications. She applied for the job. (*nevertheless*)
- 2 Geography is the study of the countries of the world. Geology is the study of the structure and origin of the earth. (*whereas*)
- 3 Over the last ten years, there has been a marked divergence in the salaries of executives and the salaries of ordinary workers. Executive pay has increased by one hundred and eighty-seven per cent, while average pay has increased by only twenty-seven per cent. (*the former/the latter*)
- 4 Shopkeepers should be penalised if they sell cigarettes to young people. The minimum age at which young people can legally buy tobacco products should be increased to eighteen. (*moreover*)
- 5 In many countries, it is very difficult to train for a new career after the age of forty. People need to think carefully before choosing an occupation. (*hence*)
- 6 There was a dispute over land ownership. The two communities had lived harmoniously for many years. (*prior to*)

6 Listen to speakers 1–7 and indicate whether the statements below are True or False.

- 1 Speaker 1 is sure her uncle will retire at 65.
- 2 Speaker 2 completely agrees that nurses should be paid more.
- 3 Speaker 3's employers have decided to give her time off to study.
- 4 Speaker 4 suspects that Jim did not write the essay himself.
- 5 Speaker 5 doesn't mind renting a flat.
- 6 Speaker 6 believes that there will be more traffic because of the new supermarket.
- 7 Speaker 7 isn't sure that she'd like to stay in Japan.

7 Listen to this Speaking Part 2 based on the following task:

Describe a problem you have experienced during your work or studies.

You should say:

how the problem arose

what you did in response

what the outcome was

and explain what you learned from the experience.

When you are ready, try the task yourself. You can make some notes to help you if you wish.

- 8** Listen to speakers 1–6 and complete the sentences below by writing one word in each gap.

- 1 There is little evidence to support the _____ that men and women communicate differently.
- 2 Conspiracy theories explaining the assassination lack _____.
- 3 The argument in support of developing a new widget is a _____ one.
- 4 The case against the chief executive is founded on _____, not facts.
- 5 The argument in favour of independence is _____.
- 6 The minister's position on deregulation is _____.

- 9** For each sentence 1–6, choose which sentence, a or b, is the most similar in meaning.

- 1 There is ample evidence that regular exercise can reduce the severity of depression.
 - Regular exercise has been proven to reduce the severity of depression.
 - There is good reason for believing that regular exercise can reduce the severity of depression.
- 2 The army crossed the border, ostensibly in pursuit of rebels.
 - The army said that they were pursuing rebels, but this was probably not the real reason they crossed the border.
 - The army crossed the border, probably because they were pursuing rebels.
- 3 The cost of living is marginally higher than it was at the same time last year.
 - Most things are a bit more expensive now than they were this time last year.
 - Most things are a lot more expensive now than they were this time last year.
- 4 The trade dispute between the two countries has reportedly been resolved.
 - People say the two countries' trade dispute has been resolved.
 - We can be sure the two countries' trade dispute has been resolved.
- 5 The bicycle tyres were recalled by the manufacturer because they were liable to burst in certain circumstances.
 - The manufacturer recalled the bicycle tyres because they had burst in certain circumstances.
 - The manufacturer recalled the bicycle tyres because they could burst in certain circumstances.
- 6 Grandfather's wish to live in his own home is undisputed; we're just not sure whether he can actually manage it.
 - We doubt whether grandfather really can or wants to live at home.
 - We know grandfather wants to live at home but we doubt whether he can.

Unit 1 People and Relationships

Track 01

- Speaker 1:** I've learned a lot from so many people, but I suppose the person that stands out is my colleague Lin. When I started working at the firm, my employer didn't give me a lot of formal training, so I had to learn on the job. I was given the desk next to Lin, and she explained everything to me. She was incredibly efficient. She knew the job so well, and she made it look so easy.
- Speaker 2:** The person I admire the most is probably my boss. She really knows what she wants to achieve with the organisation, but at the same time she is so flexible and open to new ideas. She really takes an interest not only in her clients but also in her employees. She really listens to what they have to say.
- Speaker 3:** I suppose the relationship I've found most difficult – but ultimately most rewarding – has been my relationship with my younger brother. He's different from me in almost every way you can imagine. I'm the kind of person who likes to get things done, but he is a real dreamer – so idealistic. It used to drive me crazy, but over the years, I've come to really admire him for following his dreams.

Track 02

I'm going to begin this section of my talk by saying something about only children, that is children without siblings. Historically, only children were relatively uncommon. However, these days, as families are becoming smaller, being an only child has become relatively more common. There are many reasons for this trend – social, economic, and political, which I won't go into at this point. However, I will say that having an only child generally means that parental resources can be concentrated on the one child. And I would add that, by parental resources, I mean not just money, but also care and attention.

Only children have frequently been seen as different from children with siblings and subjected to negative stereotype. They are often considered to be less tolerant of others – i.e. less able to accept differences, to allow those with different points of view to say and do as they like. Not surprisingly, they are sometimes said to be less co-operative than other children – in other words, less able to work effectively with others. On the other hand, only children are often highly regarded for their autonomy, that is to say, their ability to make their own decisions without being unduly influenced by others. In short, the picture that's emerging is of children who are rather unconventional, that is not quite 'normal' in social terms.

I think it's important to say here that many of these views have been challenged. In fact, more recent research has found that only children are, in fact, very similar to children with siblings...

Track 03

The subject of my talk today is the relationship between birth order and personality. By birth order, I mean whether an individual is the firstborn child in the family, a middle child, an only child and so on.

The belief that birth order has a lasting impact on personality is widespread and frequently referred to in popular psychology literature. Alfred Adler, an Austrian psychotherapist, was one of the first to suggest that there was a connection between birth order and personality. He noticed that firstborn children experienced a loss of status with the birth of siblings. According to Adler, this made eldest children more likely to be anxious than other children. However, on the positive side, they also tend to be conscientious and achievement-oriented, perhaps because they want to regain a position of primacy within the family.

Since Adler, there have been many attempts to establish links between birth order and a range of personality traits. Some studies have found that last-born children tend to be more extrovert and agreeable, that is, they not only seek out the company of others but also tend to get along well with other people. Middle children, on the other hand, are more likely to be rebellious, perhaps in an attempt to define themselves as 'special' in relation to their more conscientious elder siblings and agreeable younger siblings. Some studies, for example, have found that middle children are more likely to choose unconventional careers and hobbies.

However, whilst these views are widely held among the public, scholars have more recently cast doubt on their validity. Many studies have been found to employ a flawed methodology, for instance, failing to adequately consider variables such as the family's socio-economic status. Large-scale meta-analyses of studies have proved inconclusive with no single trait consistently associated with a given position within the family. Nevertheless, most people are intuitively drawn to the idea that birth order has an effect on the sort of people we become.

Now, I'm not going to go into all the details of this research, but I do want to highlight one particular study that has been widely cited as providing strong evidence for the link between birth order and personality. This study, conducted by psychologist Judith S. Stipek and her colleagues at the University of California, Los Angeles, involved a sample of 1200 children aged between 3 and 12 years old. The researchers used a questionnaire to assess each child's personality, specifically focusing on traits such as extraversion, conscientiousness, and agreeableness. They also collected information about the child's birth order, family size, and other demographic factors.

The results showed that firstborn children tended to score higher on extraversion and conscientiousness compared to later-born children. For example, firstborn children were more likely to be outgoing, friendly, and responsible. In contrast, later-born children were more likely to be agreeable, cooperative, and less competitive.

It's important to note that this study, like many others in the field, has its limitations. For instance, it only looked at a specific age range and did not consider other factors that might influence personality development, such as family environment or individual temperament.

Unit 4 Adventure

Track 04

- Speaker 1:** We had booked an excursion to the beach but chose to venture into the hills instead, hoping to see some of the local wildlife.
- Speaker 2:** Many young people in their twenties seek adventure; that's why they come to places like Thailand and Jamaica.
- Speaker 3:** We looked all over the town and eventually found a local guide to accompany us to the nearest village.
- Speaker 4:** We won't be back until the end of August. Because of the disturbances, we had to reschedule our journey for the following week.
- Speaker 5:** I think you'll find your trip down the Amazon quite an adventure. You can expect to encounter some pretty strange insects in the rainforest.
- Speaker 6:** While backpacking around Thailand, I had to learn to overcome difficulties by myself. I can't count the number of times I got lost!

Track 05

I had the most amazing adventure last year. I spent an afternoon exploring the caves near my village with a group of friends. None of us had ever been caving before, so we went with my friend's brother, who's been doing it for ages. He supplied all the equipment and showed us what to do and how to stay safe.

The route down into the earth was really narrow in places. It was quite an intense experience. At one point, I was completely wedged in between two sheets of rock. It was a struggle to stay calm. Eventually, I was able to work my way free and continue the journey.

After what seemed like ages, the tunnel opened up into this huge space underground. It was damp and pitch black – full of echoes and other strange noises. I could hear something flapping, but I couldn't see what it was. We had to tread carefully and hang onto each other as the ground was very uneven and there were pools of water all over the place, goodness knows how deep. We slowly worked our way around and back out the way we came in.

I suppose I chose to go on this adventure because I needed a challenge. I tend to get nervous in small spaces, so this was an opportunity to try to overcome my fears. Also, this was the last summer we were going to be together before heading off to university, so it was good to do something special, something memorable.

I felt really proud of myself at the end of it. It was a valuable experience. I learned that it's really liberating to face your fears. It also confirmed something that I suppose I've always known: friendship is priceless! There's no way I could have done it on my own.

Unit 5 Gadgets

Track 06

The pinhole camera is a very simple device. It consists of a cylinder with a radius of approximately 4cm and a height of 12cm. There is a small hole 1mm in diameter positioned halfway up the wall of the cylinder. A sheet of photographic paper 18cm in width curves round the inside of the cylinder leaving a gap of about 1cm just behind the pinhole. The camera is very simple to use, but it takes a long time to produce a picture. If you fix the camera outside and expose it to the light, after a few minutes, you will find that an image has appeared on the photographic paper.

Track 07

- 1 You may need to adjust the volume of the microphone so that we can hear you at the back of the room.
- 2 If we launch the game in January, we're unlikely to maximise sales.
- 3 These types of comments reinforce the notion that the unemployed don't want to work.
- 4 After lengthy negotiations, the contractor was able to secure a good deal.
- 5 The organisation has suspended operations until more money becomes available.

Track 08

- Lisa:** OK, as I understand it, we've got to build a device that will allow us to convey a ping-pong ball from one table to another a metre away. Bill, what have we got?
- Bill:** We're only allowed to use: six sheets of paper, a box of paper clips, some thread, four drinking straws, and two elastic bands.
- Lisa:** Hmm ... I'm not sure where to start. Anybody got any ideas?
- Omar:** Maybe we could use the elastic bands to launch the ball across the gap...
- Bill:** That's not a bad idea, Omar, but I think that would be rather difficult to do. Hmm ... I think we should create a sort of bridge with the sheets of paper. We could suspend it between the tables.
- Omar:** How would that work?
- Bill:** We could cut the paper into strips of about 10cm wide...
- Lisa:** I get it! ... And attach them end to end with paper clips. But how would we secure the bridge to the table?
- Omar:** We could use thread for that – I'm sure we could work something out. But what I'm not sure about is how we can keep the ball from falling off the bridge.

Track 09

- 1 achieve 2 imagine 3 measure 4 connect 5 establish
6 discuss 7 concentrate 8 define 9 determine

Lisa:

Well, if we fold the sides of the paper so that it forms a cylinder or tube, that would keep the ball from rolling onto the floor. This would also help keep the bridge rigid enough to span the distance between the tables. What do you think Bill?

Bill:

I think that's a brilliant idea. If necessary, we could use the drinking straws to further reinforce the structure.

Omar:

Do you think 10cm strips would be wide enough? What's the diameter of a ping-pong ball?

Lisa:

That's a good question, Omar. I don't know, maybe two and a half centimetres – OK what about 15cm?

Speaker A:

What would happen with the ping-pong ball? Because if the bridge becomes too tall, it might not be able to support the ball.

Speaker B:

It would fall. It would probably fall off the bridge if it was too tall. It would have to be a shorter bridge.

Speaker A:

While you're thinking about that, how much ping-pong ball diameter?

Track 45

How do you make a bridge? Well, first you need some sticks and stones and a lot of time.

Speaker A:

I had the idea of making a bridge like this, but I spent an afternoon at a park in the sun, so I had to go home. I had to go home because I had to go to work.

Speaker B:

While you were working on your bridge, did you have any difficulties?

Speaker A:

No, I didn't have any difficulties. I just had to wait for the sun to go down so I could sit down and eat my sandwich.

Speaker B:

Did you have any difficulties with the bridge? Like getting stuck in the mud or something like that?

Speaker A:

No, I didn't have any difficulties with the bridge. I just had to wait for the sun to go down so I could sit down and eat my sandwich.

Speaker B:

Did you have any difficulties with the bridge? Like getting stuck in the mud or something like that?

Speaker A:

No, I didn't have any difficulties with the bridge. I just had to wait for the sun to go down so I could sit down and eat my sandwich.

Speaker B:

Did you have any difficulties with the bridge? Like getting stuck in the mud or something like that?

Speaker A:

No, I didn't have any difficulties with the bridge. I just had to wait for the sun to go down so I could sit down and eat my sandwich.

Speaker B:

Did you have any difficulties with the bridge? Like getting stuck in the mud or something like that?

Speaker A:

No, I didn't have any difficulties with the bridge. I just had to wait for the sun to go down so I could sit down and eat my sandwich.

Unit 8 Getting Involved

Student

Track 09

1

Speaker: The Owl and the Pussy-cat went to sea
In a beautiful pea-green boat,
They took some honey, and plenty of money,
Wrapped up in a five-pound note...

2

Presenter: Now I wonder, Minister, whether you'd like to say something about the government's proposals for banking reform.

Minister: Yes, er ... thank you. As I think we all recognise, the need for change in the banking sector is long overdue.

3

Commentator: Michalski plays it into the penalty area ... to Dembinski. Dembinski out to Bajor ... Bajor beats one man, crosses the ball into the centre...

4

Presenter: And now, we'll hear Dvořák's Symphony Number 9 in E Minor 'From the New World', Opus 95, popularly known as the New World Symphony.

5

Man: But darling, I said nothing of the sort!

Woman: You most certainly did! Peter was there! He saw everything...

Man: Surely, you're not going to take Peter's word for it...

Track 10

Speaker 1: In my second year, I helped set up the university radio station. It used to broadcast everything from campus news to local bands.

Speaker 2: As a secondary school pupil, I participated in regional and national debates around the country. It was challenging and very rewarding.

Speaker 3: I've enjoyed concerts ever since I was a child. I used to love watching the conductor – I wanted to be one myself for a time.

Speaker 4: I was editor of the student magazine for a while. People sent in all kinds of articles. I had to choose what to include and then put it all together.

Speaker 5: I used to attend gallery openings all the time. I love contemporary art. Haven't got much time for it now, unfortunately.

- Examiner:** What do you enjoy doing when you're not working or studying?
- Candidate:** Well, ... I've been involved in amateur dramatics for quite a while now. I started out as an actor, taking small parts, but now I'm directing a play. It's a comedy about university life – written by the students.
- Examiner:** Tell me more about what that involves.
- Candidate:** Basically, I'm responsible for directing what happens on stage. I have to tell the actors what to do. I have to make sure the sets are all right – and the lighting, things like that.
- Examiner:** How did you first get started?
- Candidate:** I wasn't interested in theatre at all, or acting – I was quite a shy person. But my room-mate had a small part in a play and I used to go along to their rehearsals. One day, he was ill and I stood in for him. I loved it.
- Examiner:** What else do you enjoy doing in your spare time?
- Candidate:** Er ... I quite like listening to music. When I'm free in the evening, I like to go out and see local bands. I'm hoping that someday, I'll see a band that becomes really famous.

Track 13

- What do you enjoy doing when you're not working or studying?
- Tell me more about what that involves.
- How did you first get started?
- What else do you enjoy doing in your spare time?

Unit 9 Global Warming

Track 14

Hurricanes have heavy rains and are therefore more likely to cause floods. Droughts occur when there is a lack of rainfall.

Hurricanes and typhoons are both violent storms that develop over water. If the storm develops in the Atlantic or Caribbean, it is referred to as a hurricane. If it develops in the Pacific, it is known as a typhoon.

The largest glaciers in the world are found in the polar ice caps of Antarctica and Greenland. Glaciers are also found in mountains.

A current is a steady flowing movement of air or water.

Track 15

1 Sentence a: In freezing temperatures, water turns into ice and expands.

Sentence b: Metal, on the other hand, contracts when cold.

2 Sentence a: It is highly likely that glaciers will continue to melt.

Sentence b: It is unlikely that they will melt as quickly as some climate experts had predicted.

3 Sentence a: Previous predictions were based on inaccurate data.

Sentence b: More accurate information is now available.

4 Sentence a: Some climate scientists may have overestimated the rate of global warming.

Sentence b: Others may have underestimated the impact of climate change.

Track 16

In today's talk, I'm going to give you an overview of the most recent thinking on climate change. Recently, the IGPCC – the Inter-Governmental Panel on Climate Change – has conducted a major review of the evidence for climate change. In its conclusions, it states that the evidence for global warming continues to be overwhelming. However, according to the panel, some of the risk factors identified in earlier reports have been overstated, whereas other impacts of global warming may have been understated. In this talk, I'm going to outline some of the overstated risk factors and explain the current position on each. I'll then mention briefly some of the aspects of global warming that are now considered to be a more serious problem than previously thought.

One of the most significant revisions in the new report concerns estimates of rising sea levels. Previous studies had predicted that sea levels would rise by more than two metres. The latest evidence suggests that sea levels are likely to rise by no more than one metre. This is good news for many coastal areas as flood defences currently in place are much more likely to cope with a rise of one metre. A rise of two metres would have required major investment in flood defences.

Speaking tip: Possibly it's easier to speak in a monotone voice and work on your intonation. If you're doing this, then it's important to make sure that your intonation patterns are clear and effective. You can do this by practising your speech with a recording device and listening back to it to see if you've improved.

The reason climate scientists have come up with such different predictions of sea level rises has to do with our understanding of what is happening to the major glaciers and ice sheets around the world. Some appear to be contracting faster than predicted, and others appear to be expanding. In 2007, for example, the IGPCC predicted that the Arctic would be ice-free in summer by 2080. The latest predictions bring this date forward by 20 years to 2060. In the Antarctic, on the other hand, the ice sheet appears to be expanding as sea water freezes over. This variability in ice sheet activity accounts for the differences in our predictions of rising sea levels.

Another significant revision of our understanding of climate change concerns the Gulf Stream. As many of you probably know, the Gulf Stream is a current of warm sea water that travels from the tropics northeastwards across the Atlantic. It is responsible for keeping temperatures in Europe and North America 5–10 degrees warmer than they would be otherwise. An earlier study concluded that the flow rate of the Gulf Stream had decreased by 30 per cent since the 1950s. It warned that the northern hemisphere could be heading for another ice age, in other words, a period of prolonged cold. However, a more recent study has indicated that currents of warm water have actually accelerated in the last 20 years. Climate scientists now believe that these differences are due to natural variability and that the Gulf Stream is unlikely to disappear. This is good news for those who live in Europe and North America.

I'd like to move on now and mention some of the consequences of global warming and some of the risk factors which may have been underestimated by previous studies. As far as consequences go, there is new evidence that tropical forests are more susceptible to drought than previously thought and that the severity of severe weather events such as hurricanes and typhoons may have been underestimated in the past. This is particularly bad news for those who live in southern regions. More worrying, there is stronger evidence that thawing permafrost in northern regions is producing very high emissions of methane gas. As I explained in an earlier lecture, methane is a much more potent greenhouse gas than carbon dioxide. This thawing ground has the potential to significantly exacerbate climate change. I therefore have to conclude this talk by saying that, in spite of the good news on rising sea levels, global warming continues to be a serious cause for concern. To ignore it would be most irresponsible.

Unit 10 Revision 1

Track 17

- Patient 1:** It's definitely a bacterium and not a virus that's caused your inflammation, so I'm going to prescribe a course of antibiotics.
- Patient 2:** I suggest that over the next six months you follow a reduced-calorie diet and exercise for 30 minutes three times a week. Come and see me in four weeks' time and we'll see how you're getting on.
- Patient 3:** You appear to have developed a sensitivity to pollen. You may need to stay indoors at certain times of the year and take antihistamines to improve your condition.
- Patient 4:** I think your headaches may be due to the fact that you haven't been taking in enough fluids. You really need to drink at least a litre of water a day.
- Patient 5:** I'm afraid you're going to continue to experience some weakness in your left-hand side. I've referred you to the physiotherapist and prescribed medication to prevent a further occurrence.

Track 18

- Speaker 1:** It took us forever to get out of the city. We must have driven for an hour and a half – nothing but shopping malls and bungalows as far as the eye could see.
- Speaker 2:** I don't mind the grime, the crime or the noise. And the skyscrapers are just amazing. It's a vertical city. You really need to see it to believe it.
- Speaker 3:** We stayed in a lovely little cottage, surrounded by meadows. It was gorgeous – so peaceful.
- Speaker 4:** The High Street is thronged during the festival. Street performers, clowns, acrobats, all kinds of people peddling all kinds of crazy things. You'd love it.
- Speaker 5:** I'd read so much about it when I was at school. I couldn't believe I was actually there, an ancient town, almost perfectly preserved. You weren't allowed to take photographs, but I did anyway – when no one was looking, of course.

Track 19

- Speaker 1:** I was never cut out to be an engineer. I just can't do the maths. So, yes, on the whole I think changing over to product design was the right decision for me.
- Speaker 2:** Whenever we got together to revise, she'd end up moaning about her landlord. She was a good student, but looking back I don't think the arrangement really worked.
- Speaker 3:** I can understand why universities may want to increase tuition fees, but if they increase them threefold, only the rich will be able to afford it.
- Speaker 4:** I see the pass rates have gone up again this year. That would never have happened in my day, even though we were much better informed than kids nowadays.
- Speaker 5:** Basically, it allows me to pursue my interest in music and keep my job in the recording studio. It's not so intense, either. I've got time to think about what I'm learning, absorb it at my own pace.

Unit 12 Describing Changes

Track 20

- 1 **Examiner:** How are schools today different from schools in your parents' generation?
- Candidate:** There is much less discipline and pupils are difficult to control. Standards of behaviour have really declined.
- 2 **Examiner:** In what ways has the countryside in your country changed during your lifetime?
- Candidate:** There are far fewer young people living in the countryside. Many of them have had to abandon rural life and move to the cities to look for work.
- 3 **Examiner:** What do you think is the most significant change in the way people communicate?
- Candidate:** Social networking sites – definitely. Just look at the way they've evolved over the last few years. You could almost spark a revolution with a click of a mouse.
- 4 **Examiner:** What do you think will be the most significant change in people's lifestyle in the next ten or twenty years?
- Candidate:** Er ... I think as energy becomes more expensive, we will have to modify how we live – consume less, conserve more.
- 5 **Examiner:** In what ways has the experience of living abroad affected you?
- Candidate:** I've had to learn to adjust to different ways of doing things – shopping, cooking, socialising – all sorts of things.
- 6 **Examiner:** How, in your view, are patterns of employment in your country likely to change in the next few years?
- Candidate:** Many more people are going to work in financial services. That whole sector is developing very rapidly in my country. There are lots of opportunities now.

Track 21

- 1 I grew up in a village that looks much as it did five centuries ago. Almost nothing has altered.
- 2 Job security has diminished over the last few years. It's almost impossible to find long-term work let alone a job for life.
- 3 I think over the next decade, surgical techniques will become increasingly refined. Surgeons will be able to perform operations that we can only dream of now.
- 4 Within a generation, attitudes towards authority have shifted. Nowadays, people are more likely to challenge authority figures.
- 5 Unless we transform the way we live, we're unlikely to survive into the next millennium.

Track 23

- 1 Do you think people are more adventurous now than in the past?
- 2 Why, in your view, have attitudes towards risk changed?
- 3 What sort of adventures do you think people will be having in ten or twenty years' time?

Track 24

Examiner: Do you think people are more adventurous now than in the past?

Candidate: On the whole, yes, I think they are. When I compare young people today with my parents' generation, I would say that attitudes have shifted. People expect more from life and want to develop personally as well as professionally. People are looking for experiences that will transform them in some way – give them new insights. For example, many people my age want to travel abroad and experience very different lifestyles.

Examiner: Why, in your view, have attitudes towards risk changed?

Candidate: I suppose society has evolved. There is a greater emphasis on independence and originality. You can't develop these qualities without taking risks. In my country, previous generations were more likely to conform. People would adjust their behaviour so as not to stand out too much. These days, people want to be a bit different; they want to stand out from the crowd.

Examiner: What sort of adventures do you think people will be having in ten or twenty years' time?

Candidate: I think as tourism extends into every corner of the world, interest in foreign travel as a form of adventure will diminish. People will look for adventure closer to home, maybe by being more creative – doing things that haven't been done before. I have a friend who's lost his job and had to abandon his plans to travel abroad. He's going to see how far he can get by travelling on local buses. I think he's calculated that he can get halfway across the country. It will be quite an adventure!

Unit 13 Expressing Similarities and Differences

Track 25

- 1 Victor and Vincent are identical twins.
- 2 Boys and girls rarely think alike.
- 3 We enjoy watching a diverse range of films.
- 4 Psychiatry and psychology are two distinct disciplines.
- 5 The average cost of a house today is equivalent to six years' average annual salary.
- 6 The minister was sacked for expressing views that were contrary to those of the government.
- 7 The majority of female respondents reported spending more on sugary snacks; conversely, the majority of male respondents said they had spent more on savoury snacks.
- 8 People who do similar work should receive comparable rates of pay.

Track 26

- 1 In order to stay healthy, it is important to eat a varied diet.
- 2 The risk of flying in a light aircraft is comparable to that of sailing in a small boat.
- 3 He decided to accept my recommendation, which was based on a detailed comparison of the two courses.
- 4 There is a remarkable resemblance between this song and one that was recorded thirty years ago.
- 5 Every student in the class interpreted the essay question differently.
- 6 The opinions he expresses in his blog are often in complete contrast to those he expresses on television.
- 7 The lecturer contrasted the last three major economic crises.

Track 27

Many people today complain of job-related stress. Indeed, numerous surveys have shown that most working adults today perceive the workplace to be a more challenging environment than in previous generations.

Although on the surface of it, stressful work and challenging work may appear to be identical, it is important to distinguish between the two terms. Job stress occurs when the demands of a job do not match the workers' needs, resources or skills. A teacher who is required to teach a subject he or she knows nothing about or is not interested in is likely to experience job stress. Prolonged job stress can result in poor physical or emotional health, or what we call 'burnout'.

A challenging job is very different in that it encourages the worker to develop skills and resources. Meeting a challenge is rewarding. It is comparable to stretching out to grasp a prize that is nearly within reach. Challenging work can be energising and contribute to a greater sense of well-being. In fact, an appropriate level of challenge is essential for good physical and emotional health.

While we often see some jobs as being inherently stressful or challenging, it is important to remember that these qualities are a function of the match between the worker and the job. Two workers may well have very different experiences of the same job as no two workers are alike. What is a stressful job for one may well be a challenging job for another.

Unit 16 Adverbs

Track 28

- 1 Surprisingly, the prime minister has been elected for a second term.
- 2 Interestingly, more young people voted in this election than in the previous one.
- 3 Absolutely! I'd love to return to Africa some day.
- 4 Supposedly, travel broadens the mind.
- 5 Undoubtedly, cooking with natural ingredients is better for your health.
- 6 Inevitably, the cost of fuel will rise.
- 7 Presumably, fewer people will travel by car if petrol becomes too expensive.

- 4 presumably
- 5 supposedly
- 6 surprisingly

Track 30

Tell me about the house or flat you live in.

How do you feel about living there?

Is the decoration or appearance of the place you live important to you?

When choosing things for your flat, is the appearance of an object more important to you than how well it works?

Track 31

Hello. My name is Susan Davie. Can you tell me your full name, please?

Thanks. Can I please see your identification?... Thanks, that's great. I'm going to ask you some questions about yourself now.

Tell me about your favourite film or television programme.

How do you think television has changed since you were a child?

Are there any types of programmes that you don't like to watch?

I'd like to ask you a few questions about transport. How do you normally travel to your work or place of study?

How do people in your country normally travel?

How easy is it to get around in your country?

We're now going to talk about places of interest in your country. What do you think is the most interesting building or monument in your country?

Do you prefer historic building styles to modern architecture?

To what extent do people in your country value traditional architecture?

Unit 17 Expressing Problems and Solutions

Track 32

- 1 As I was getting into the car, I saw the crack in the windscreen. I have no idea how it happened, but it's going to be expensive to repair.
- 2 My grandmother's feeling poorly and lost her appetite. I'm afraid she's not as strong as she used to be, but I don't know what I can do to help.
- 3 I've just been told that I've got to show my identification card to get a new key for my locker. But I think I left my ID in the locker before I lost my key. What a ridiculous situation!
- 4 I think you'd better come home straight away. That big tree in the garden has come down onto the power line in front of the house. It looks really dangerous.
- 5 I've just been invited to go to Alaska with my brother and his wife – it's the trip of a lifetime! But I should really save the money to pay for my course. I just can't decide what to do.

Track 33

- 1 Don't worry. The damage to your car can be easily repaired.
- 2 I'm sure you'd like to do more to alleviate her suffering.
- 3 If you speak to the manager, she may be able to resolve your predicament.
- 4 I'll be right over! That's not a crisis you should tackle on your own.
- 5 You're never going to resolve that dilemma until you decide what you really want.

Track 34

Good morning, everyone. I'm Kerry Wilson, one of the student welfare team, and I'm going to talk to you about how to deal with some of the difficulties that may arise while you're studying with us. Of course we hope that you won't experience any problems during your studies, but it's good to know what help is available should anything go wrong.

I know some of you have had a problem opening a bank account and that you are anxious about paying your course fees. If you're in this predicament, don't worry. To open an account, you need to present evidence that you are enrolled on a full-time course. Just go to the Language Centre office and ask for a letter of enrolment. As long as you have registered for the course, you can get a letter. You don't need to have paid your fees.

For those of you who are living in private accommodation, we would advise you to speak to one of the student welfare team before signing a lease. Sometimes disputes can arise, for example, in relation to damage to property. If you have a disagreement with your landlord, one of the welfare team can intervene if necessary.

Finally, the student welfare office can be phoned at any time during the day or night in case of an emergency. If your room is burgled for example, do not hesitate to phone the emergency number in your welfare handbook. This type of crisis is very rare, but please be assured that help is available should you require it.

Unit 20 Revision 2

Track 35

- 1 Government cuts to public spending triggered a second economic downturn.
- 2 Many environmentalists believe that the offshore oil industry has resulted in significant damage to marine life.
- 3 Interestingly, the Second World War contributed to the expansion of female employment, in particular, the increase in numbers of women doing jobs typically reserved for men.
- 4 A number of commentators have said that the recent public disorder stems from the high rates of youth unemployment.
- 5 Some people even believe that your genes determine whether or not you succeed in life.
- 6 The return of wolves to southern regions of Europe has provoked fear and anger among many farmers.
- 7 There is evidence that some skin conditions can result from excessive cleanliness.

Track 36

- Speaker 1:** My uncle turns 65 next year, at which point he'll presumably retire.
- Speaker 2:** Do I think nurses should be better paid? Absolutely!
- Speaker 3:** My employers have provisionally agreed to give me time off to complete my studies.
- Speaker 4:** Supposedly, Jim wrote the essay himself, but it looks to me like he had a bit of help.
- Speaker 5:** Ideally, I'd like to buy a flat of my own, but unfortunately, it looks like I'll have to rent for a few more years.
- Speaker 6:** Inevitably, the new supermarket is going to bring more cars into the area.
- Speaker 7:** I'd like to stay in Japan indefinitely, but I'm not sure that's going to be possible.

Track 37

I guess one of the most difficult dilemmas I've faced concerns a colleague Lydia, who also happens to be a friend. I'd been given the task of organising a series of social events for a group of schoolchildren visiting from Germany, and I thought it would be a great idea to work with Lydia, so I persuaded my boss to assign her to me as an assistant. I have to say, it was a mistake from the start. Lydia was so disorganised, kept forgetting what she was to do, lost track of what she'd paid for and so on. I suppose, looking back she just didn't have the experience or the skills for the job. Don't get me wrong, she was a great laugh and we're still friends, but I had to work overtime to sort everything out. Looking back, I can see that I didn't really address the problem directly. I just covered up for her mistakes and made sure the programme ran smoothly. I didn't want my boss to intervene. I suppose I felt partly to blame because I hadn't really thought carefully about whether she was really suitable for the job. Anyway, that experience has taught me that it's safer to keep friendship and work matters separate.

Track 38

- 1 I don't really subscribe to the notion that men and women have fundamentally different styles of communication. Where's the evidence?
- 2 You really have to question the credibility of some of the conspiracy theories surrounding the assassination.
- 3 I didn't think we should invest in developing a new widget, but he put forward a valid argument and I'm now prepared to go along with it.
- 4 The accusation that the chief executive knew about the illegal activities of his employees is based on pure conjecture.
- 5 The case for independence is now so compelling I can't see an alternative course of action.
- 6 The minister's stance of deregulation is bound to be biased – he's got a considerable financial interest in the industry.

Exam practice model answer

Just before you leave, I'd like to discuss a few points. I'm going to start by talking about the first point. I think it's important to remember that there are many different ways of approaching a situation. For example, if you're going to write a letter to your local MP, you could write a formal letter, or you could write a more informal letter. It depends on what you're trying to achieve. If you're trying to complain about something, for example, you might want to write a formal letter. But if you're trying to ask for something, like a refund, you might want to write a more informal letter. This is just a general rule, though, and it's not always true. There are times when a formal letter might be better, and there are times when an informal letter might be better. So, it's important to think about what you're trying to achieve and what the best way to approach it is.

Practice patches

Now, let's move on to the second point. I think it's important to remember that there are many different ways of approaching a situation. For example, if you're trying to complain about something, for example, you might want to write a formal letter. But if you're trying to ask for something, like a refund, you might want to write a more informal letter. It depends on what you're trying to achieve. If you're trying to complain about something, for example, you might want to write a formal letter. But if you're trying to ask for something, like a refund, you might want to write a more informal letter. This is just a general rule, though, and it's not always true. There are times when a formal letter might be better, and there are times when an informal letter might be better. So, it's important to think about what you're trying to achieve and what the best way to approach it is.

Exam practice model answer

There has been considerable debate in recent years over the role of free speech in a free society. Some object to absolute freedom of speech. Others advocate free speech, arguing that the ability to tolerate different points of view is a hallmark of civilised society. Whilst I acknowledge that there are strong arguments on both sides, I would suggest

that freedom of speech should be protected in all but extreme circumstances. In this essay, I will outline two main reasons.

Firstly, if people are not allowed to express their views freely, they may choose to take action instead. This is what happened in Eastern Europe in the 1980s. The same is happening again in other regions of the world today. People may choose to behave destructively, to riot, for example, when they have no other means of being heard.

Secondly, history shows that great thinkers of the past have often been censored for ideas that are now widely accepted as valid. The sixteenth-century astronomer Galileo, for example, was condemned for advocating a sun-centred theory of the solar system. More recently, many dissident writers, scientists and thinkers who had been silenced in the past have come to be celebrated for their achievements.

In short, freedom of speech is essential for a peaceful, just and progressive society. It may be challenging for society to allow differences of opinion out into the open; however, the consequences of restricting free speech are likely to be more damaging in the longer term.

- 9 Model answer

Global warming has long been recognised as a serious problem by most climate scientists. Governments around the world have begun to take the necessary measures to address it. However, as our understanding of the scale and nature of the problem is still developing, efforts to tackle global warming need to be reassessed from time to time.

Recent evidence suggests that some risk factors associated with climate change may have been overstated. Sea levels are now expected to rise by approximately one metre, not two metres, as previously thought. This is because some glaciers and ice sheets appear to be contracting, the Arctic, for example, while others, such as the Antarctic, appear to be expanding. Also, it is now thought

that the Gulf Stream is unlikely to vanish. It may, therefore, be possible to scale back plans for flood defences in coastal areas.

However, there is also evidence that some of the consequences of climate change may have been understated. Tropical forests are now believed to be more vulnerable to drought. Hurricanes and typhoons may become more severe. Greater efforts should therefore be made to protect vulnerable populations, especially in tropical areas. Buildings in storm-prone areas may also need to be redesigned to withstand high winds.

These recommendations, however, address the symptoms of global warming, not the root cause: the generation of greenhouse gases. Whatever the precise scale and nature of the consequences of global warming, they are all undesirable. Clearly, more needs to be done to reduce the burning of fossil fuels. Stricter emissions targets should be set and the use of alternative sources of energy encouraged. It would be profoundly irresponsible to do nothing about the causes of global warming.

Exam practice model answer

The charts show the percentage breakdown of government spending across nine categories in 2000 and 2010. Over the ten-year period, there were significant changes in expenditure.

In both years, the four largest areas of government expenditure were education, health care, pensions, and defence, with education taking the largest share (24% in 2000 and 21% in 2010). The smallest areas of expenditure

were transport, culture and leisure and 'other'. Interest on borrowing and spending on welfare lay in between.

Interestingly, between 2000 and 2010, spending on all four of the largest areas had dropped, with the exception of pensions, which remained the same at 19%. Spending on transport and culture and leisure also fell significantly, with the transport budget declining by two thirds. On the other hand, spending on welfare and interest on government borrowing rose markedly, with the latter doubling over the ten-year period to 10%.

Overall, the charts indicate that the government has had to cut expenditure in most areas in order to fund the cost of borrowing and welfare.

Exam practice model answer

Studying abroad has become increasingly common in the last few years, especially for young people from countries such as China and India. Many students and their families clearly consider the experience worth the sacrifices involved. The former often give up friendships when they move abroad; the latter often use their life savings. Moreover, many governments are willing to invest huge sums of money in sponsoring their young people to study in universities overseas. However, this trend has drawbacks as well as benefits for those concerned.

One potential drawback is that the instruction international students receive may not be relevant to their home contexts. For example, students from developing countries who go to Western countries for teacher training are often taught to use teaching techniques that are suitable for small classes. When they return home, they are often expected to teach classes of 40 or 50 students. Hence, what they have been trained to do may not be relevant.

Another potential drawback is the phenomenon of 'brain drain'. Prior to leaving home, they may be fully committed to returning. Nevertheless, students are often at the stage in their lives when they are forming their most important personal and professional relationships. Thus, they may choose to remain in the host country on completing their studies.

However, most international students find ways of making the experience work well for themselves and others involved. Most return home, enriched by new friendships made abroad. Furthermore, most find ways of adapting what they have learned to their home contexts. On balance, the drawbacks do not outweigh the benefits.

Exam practice sample answer

Examiner: Hello. My name is Susan Davie. Can you tell me your full name, please?

Student: Anna Delgado.

Examiner: Thanks. Can I please see your identification?... Thanks, that's great. I'm going to ask you some questions about yourself now. Tell me about your favourite film or television programme.

Student: A television programme I particularly like is a comedy about people who work in an office. It looks quite ordinary on the surface, but the characters are very funny. If you've ever worked in an office, you would understand the humour.

Examiner: How do you think television has changed since you were a child?

Student: There are a lot more television channels, so, supposedly, there is a lot more choice. But in fact, many of the programmes today are very similar. In the past, there were fewer programmes but more variety.

Examiner: Are there any types of programmes that you don't like to watch?

Student: Absolutely. I really don't like soap operas. I find the story lines completely unrealistic, and I can never keep track of all the different characters and how they're related.

Examiner: I'd like to ask you a few questions about transport. How do you normally travel to your work or place of study?

Student: I usually walk to work as my workplace is only two kilometres from my home. It takes me approximately 25 minutes to get there. However, if the weather is bad, I get a lift from my brother or my sister-in-law.

- Examiner: How do people in your country normally travel?
- Student: More and more people own a car, so, inevitably, most people travel by car. Unfortunately, it's not the healthiest or most environmentally friendly mode of travel, but it is convenient.
- Examiner: How easy is it to get around in your country?
- Student: It's relatively easy to get around, especially by car. The road network is extensive and generally in a good state of repair. The exception is in the mountainous areas in the west, where the roads are comparatively rough and narrow.
- Examiner: We're now going to talk about places of interest in your country. What do you think is the most interesting building or monument in your country?
- Student: Undoubtedly, the national museum. It was once a palace but it now houses the national art collection. It was built approximately 400 years ago and each room has a particular theme. My favourite room is designed around the theme of music and holds the museum's collection of musical instruments.
- Examiner: Do you prefer historic building styles to modern architecture?
- Student: Not necessarily. I think there are a lot of interesting buildings being built these days. I like the way glass and steel can be used to create light airy spaces.
- Examiner: To what extent do people in your country value traditional architecture?
- Student: Generally speaking, people still prefer traditional architecture, and the government has promoted the conservation of historic buildings. Not surprisingly, it's very difficult to get permission to alter a traditional structure or construct a modern building in an old area.

Exam practice model answer

The graph shows the average number of hours children spent on television viewing daily in the period between 1950 and 2010.

From 1950 to 1960, there was a modest rise in the average number of hours children spent in front of the television set. This was followed by a marked increase from approximately one hour to four hours of viewing per day among children between 1965 and 1980. Over the next five years, there was a decrease. However, this trend proved negligible as the viewing figure then rose again marginally. Between 2000 and 2010, there was another modest decline in the hours children spent watching television.

Overall, there has been a significant rise in children's television viewing over the sixty-year period, though there is some indication that this trend may be changing.

Model answer

Overall, the graph indicates that there were greater fluctuations in gym membership among men than among women. The number of male members started the period at just over two thousand and reached highs of four thousand in 1985 and five thousand around 2005. The lowest rates were between 1993 and 1997 and more recently in 2010 when the rate dipped as low as one thousand.

Female gym membership began lower at just over one thousand, doubled by 1987, and then fluctuated between two and three thousand for the remainder of the period. When male rates were at their lowest, female rates were higher. This was particularly true between 1993 and 1997 when nearly three thousand women held gym membership.

In brief, there were marked differences in rates of male and female gym memberships in the period covered.

3 Over the last ten years, there has been a marked divergence in the salaries of executives and the salaries of ordinary workers; the former has increased by one hundred and eighty-seven per cent, while the latter has increased by only twenty-seven per cent.
4 Shopkeepers should be penalised if they sell cigarettes to young people; moreover, the minimum age at which young people can legally buy tobacco products should be increased to eighteen.
5 In many countries, it is very difficult to train for a new career after the age of forty; hence, people need to think carefully before choosing an occupation.

The International English Language Testing System (IELTS) Test

IELTS is jointly managed by the British Council, Cambridge ESOL Examinations and IDP Education, Australia.

There are two versions of the test:

- Academic
- General Training

Academic is for students wishing to study at undergraduate or postgraduate levels in an English-medium environment.

General Training is for people who wish to migrate to an English-speaking country.

This book is primarily for students taking the Academic version.

The Test

There are four modules:

Listening	30 minutes, plus 10 minutes for transferring answers to the answer sheet NB: the audio is heard <i>only once</i> . Approx. 10 questions per section Section 1: two speakers discuss a social situation Section 2: one speaker talks about a non-academic topic Section 3: up to four speakers discuss an educational project Section 4: one speaker gives a talk of general academic interest
Reading	60 minutes 3 texts, taken from authentic sources, on general, academic topics. They may contain diagrams, charts, etc. 40 questions may include a variety of tasks, such as multiple choice, sentence completion, completing a diagram/graph/chart, choosing headings, Yes/No or True/False questions, classification, and matching exercises.
Writing	Task 1: 20 minutes – description of a table, chart, graph or diagram (150 words minimum) Task 2: 40 minutes – an essay in response to an argument or problem (250 words minimum)
Speaking	11–14 minutes A three-part face-to-face oral interview with an examiner The interview is recorded. Part 1: introductions and general questions (4–5 mins) Part 2: individual long turn (3–4 mins) – the candidate is given a task, has one minute to prepare, then talks for 1–2 minutes, answering some questions given by the examiner. Part 3: two-way discussion (4–5 mins) – the examiner asks further questions on the topic from Part 2, and gives the candidate the opportunity to discuss more abstract issues or ideas.
Timetabling	Listening, Reading and Writing must be taken on the same day, and in the order listed above. Speaking can be taken up to 7 days before or after the other modules.
Scoring	Each module is given a band score. The average of the four scores produces the Overall Band Score. You do not pass or fail IELTS; you receive a score.

IELTS and the Common European Framework of Reference (CEFR)

The CEFR shows the level of the learner and is used for many English as a Foreign Language examinations. The table below shows the approximate CEFR Level and the equivalent IELTS Overall Band Score:

CEFR Description	CEFR Code	IELTS Band Score
Proficient user (Advanced)	C2	9
	C1	7.5–8
Independent user (Intermediate – Upper Intermediate)	B2	6.5–7
	B1	5.5–6

This table contains the general descriptors for the band scores 1–9:

IELTS Band Score		
9	Expert user	Has fully operational command of the language: appropriate, accurate and fluent with complete understanding.
8	Very good user	Has fully operational command of the language, with only occasional unsystematic inaccuracies and inappropriacies. Misunderstandings may occur in unfamiliar situations. Handles complex detailed argumentation well.
7	Good user	Has operational command of the language, though with occasional inaccuracies, inappropriacies and misunderstandings in some situations. Generally handles complex language well and understands detailed reasoning.
6	Competent user	Has generally effective command of the language despite some inaccuracies, inappropriacies and misunderstandings. Can use and understand fairly complex language, particularly in familiar situations.
5	Modest user	Has partial command of the language, coping with overall meaning in most situations, though is likely to make many mistakes. Should be able to handle basic communication in own field.
4	Limited user	Basic competence is limited to familiar situations. Has frequent problems in understanding and expression. Is not able to use complex language.
3	Extremely limited user	Conveys and understands only general meaning in very familiar situations. Frequent breakdowns in communication occur.
2	Intermittent user	No real communication is possible except for the most basic information using isolated words or short formulae in familiar situations and to meet immediate needs. Has great difficulty understanding spoken and written English.
1	Non user	Essentially has no ability to use the language beyond possibly a few isolated words.
0	Did not attempt the test	No assessable information provided.

Marking

The Listening and Reading papers have 40 items, each worth one mark if correctly answered. Here are some examples of how marks are translated into band scores:

Listening: 16 out of 40 correct answers: band score 5
 23 out of 40 correct answers: band score 6
 30 out of 40 correct answers: band score 7

Reading: 16 out of 40 correct answers: band score 5
 23 out of 40 correct answers: band score 6
 30 out of 40 correct answers: band score 7

Writing and Speaking are marked according to performance descriptors.

Writing: examiners award a band score for each of four areas with equal weighting:

- Task achievement (Task 1)
- Task response (Task 2)
- Coherence and cohesion
- Lexical resource and grammatical range and accuracy

Speaking: examiners award a band score for each of four areas with equal weighting:

- Fluency and coherence
- Lexical resource
- Grammatical range
- Accuracy and pronunciation
